“It’s in **your hands**”

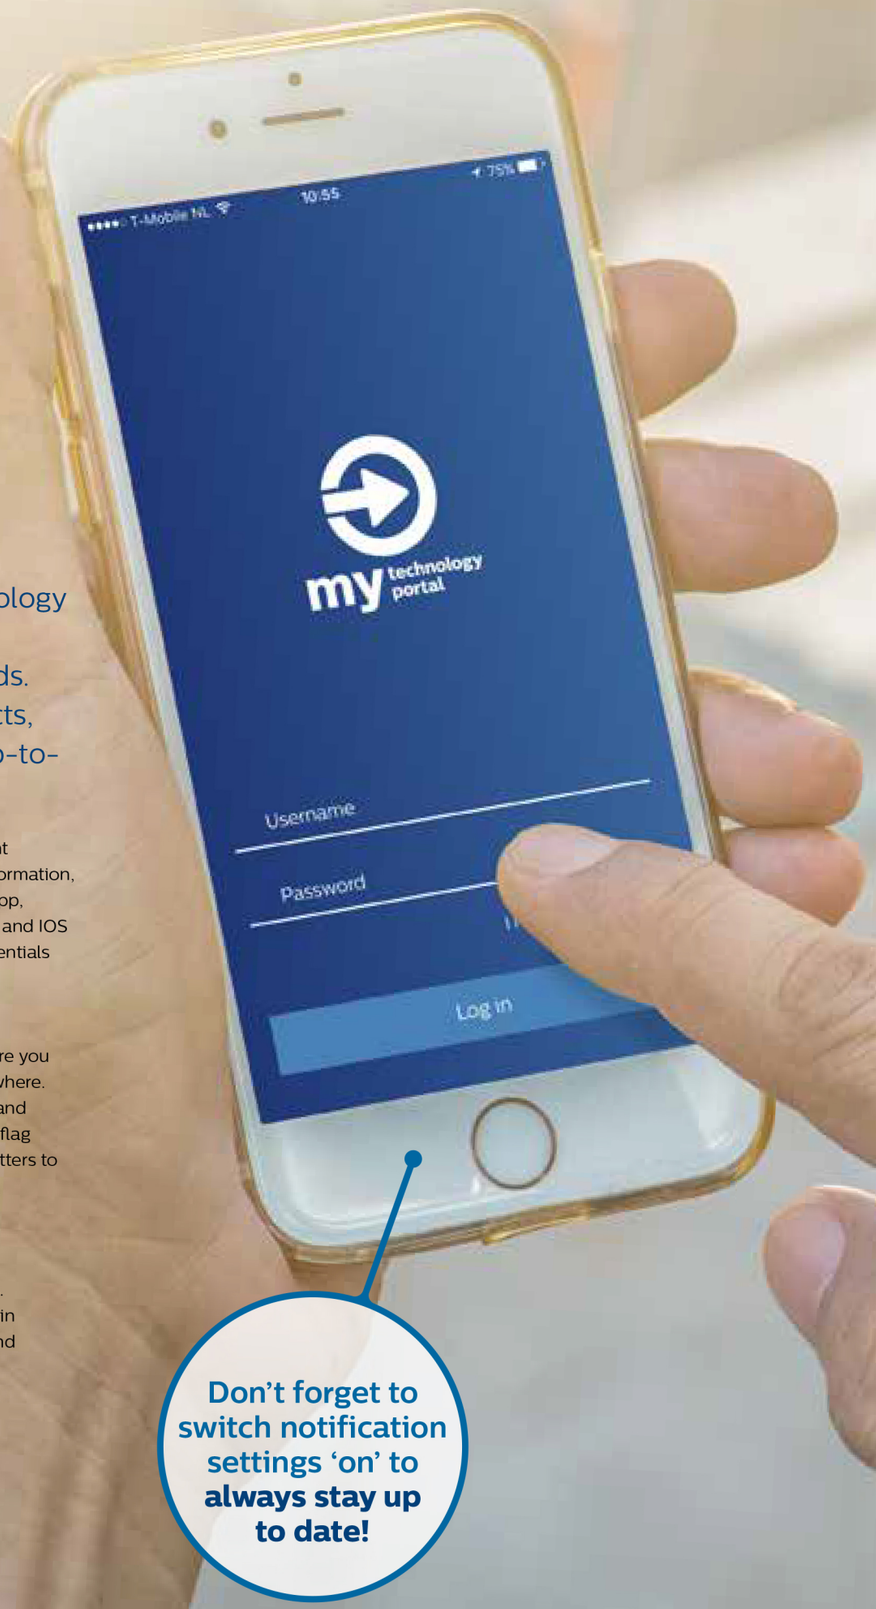
One-stop-support

With the new improved My Technology Portal App, you have all the information you need in your hands. Whether you’re looking for products, orders or general news, staying up-to-date is always at your fingertips.

The app for your smartphone or tablet gives you instant access to a wide range of support tools. All product information, OEM-news and order information is available on the app, which is free to download for Android via Google apps and IOS via AppStore. Just log-in with your existing portal credentials and get started!

Order status to-go
New on both the portal and the app is My Orders, where you can review the status of your orders always and everywhere. Moreover, you will see the most recent developments and upcoming phase-outs within the New section and can flag any item as favorite to enable quick access to what matters to you in the Favorite section.

A personalized space
You can see at once what’s relevant to you by filling in your ‘Fields of Interest’ to highlight preferred segments. These features and email updates support your needs in planning changes to products and creating ideas around new developments.



Don’t forget to switch notification settings ‘on’ to **always stay up to date!**

my technology portal

Support from design-in to delivery
My Technology Portal is your personal link to our services, and the user friendly dashboard offers you a complete library of product- and marketing related information. It also provides access to our online service tools, your Key Account Manager and direct connection to relevant contacts and news.

New on the Portal and app:

My Orders, review your orders, and check order status and delivery information

Plus all these benefits now always at your fingertips:

News, including webinars, tutorials, videos, event information and market specific insights

Portfolio, a customized overview including order history, quantity, phase-out information, search & Excel download

Webshop, where you can order available samples, track and trace your order

Product news, all upcoming introductions and phase-outs including dates, codes, all needed files and quick links to order samples and to submit a price-request

My account, with custom product news in line with your needs, and notification management

Share center, to share files with your Key Account Manager and find relevant documentation

Tools, including Easy Design-In, Gear Selection, MultiOne configuration

Contacts, see your relevant contacts and get in touch
