Safety you can see!

Our advanced light engine technology has been on the forefront of automotive lighting for more than 100 years.
As a **leading supplier** of lamps and lighting products to the automotive industry and aftermarket, we combine technical innovations with a genuine concern for **safety** and driving comfort.
Our automotive lighting is today the choice of many consumers and major automobile manufacturers.
Our mission is to introduce **innovative products** that constantly improve road safety and increase workshop productivity.

Our products are designed to perform efficiently and durably for continuous **customer satisfaction**.
Many garages and workshops already appreciate our new range of professional LED work lights for their outstanding light output and robustness.

High-quality lighting really does make a difference.
That's safety you can see!

Original equipment quality

We are committed to producing **best-in-class products** and services in the Original Equipment Manufacturer (OEM) market and automotive aftermarket. Our products are manufactured from **high-quality materials** and tested to the highest specifications to maximize **safety** and driving **comfort** of our customers.

- We are the **choice** of major car manufacturers
- Our lighting equips **one in two cars** in Europe and one in three in the world
- Manufacturing processes that **exceed** current industry **specifications**

Philips anti-UV-quartz glass for optimal lighting performance

All Philips quartz-glass lamps also offer a UV shield to protect your modern plastic optics from harmful UV rays.

- **More powerful light**
  Quartz glass high resistance allows for increased pressure inside the lamp and thus generates more powerful light.
- **Better resistance**
  Philips quartz glass lamps (filament at 2 800°C and glass up to 800°C) are capable of withstanding severe thermal shocks.
- **Optimal protection against ultraviolet rays**
  All Philips quartz-glass lamps also offer a UV shield to protect your modern plastic optics from harmful UV rays.

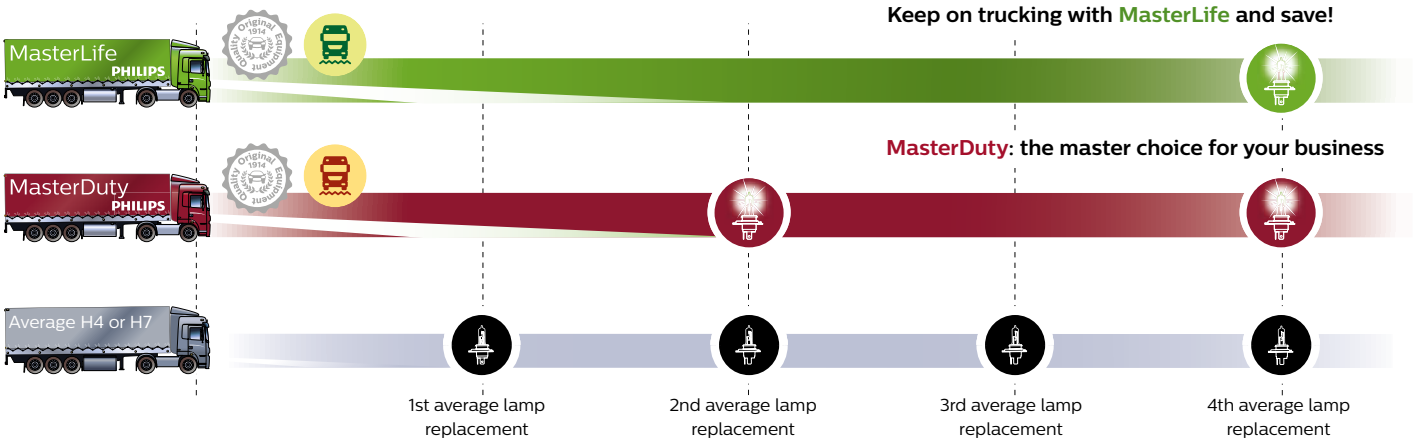
* Compared to the minimum legal standard, applies to H1, H4, H7 and H11
** Lifetime differs per type, indication for H7 only

philips.com/trucklight

Safety and durability

Philips 24V headlighting advantage

Combining **vibration resistance** with **high quality**,
Philips truck headlamps last longer than standard lamps.



MasterDuty

Built to last

- **Lasts up to 550 hours***
- **Maximum vibration resistance**
- **Up to 130% more vision****
- **Reinforced mount and base guards against shocks**
- **Extra robust double-coil filament**

The Philips MasterDuty headlamps are designed for **maximum vibration resistance** and excellent **lifetime**. MasterDuty is the **right choice** for drivers seeking **toughness** that **lasts**.

*Lifetime differs per type, indication for H7 only
**Compared to the minimum legal standard, applies to H1, H4, H7 and H11.

Available in B1 and C1 packaging

Available in

MasterLife

Best-in-class lifetime

- **Lasts up to 1200 hours***
- **Up to 100% more vision****
- **Maximum vibration resistance***
- **Extra-robust double-coil filament**

Philips MasterLife lasts up to **1200 hours*** while withstanding extreme **stress** and **vibration**. With a **minimum failure rate** our lamps keep your fleet productive and on the move by minimizing time-consuming interruptions.
MasterLife is the smartest choice for large fleet owners!

*Lifetime differs per type, indication for H7 only.
**Compared to the minimum legal standard, applies to H1, H4, H7 and H11.

Available in C1 packaging

Available in

Kits

Spare and headlight restoration **kits** for cars and trucks

For increased **safety**, it is **recommended** by most European countries that all vehicles be equipped with a **homologated spare kit**. It will not only keep drivers in **compliance** with the law, but will also keep them **safer** as they will always be prepared to **replace** a burned-out lamp.

Our **Headlight restoration kit** renovates car, truck and two-wheeler lenses to like-new condition. It's our **cost-effective alternative** to complete headlight replacement.

Headlight restoration kit

Restores headlight lenses to like-new condition!

- **Less glare and up to 100% brighter lenses**
- **Provides safer night-time driving**
- **Removes haze and yellowing from harmful UV-rays and dirt**
- **Professional results without power tools in 30 minutes**
- **High-quality and economical**
- **2-year UV-protection guaranteed**

Removes the fading and yellowing of headlight lenses and restores them to their original state of **transparency** for **greater safety**. Headlight lenses fade and oxidize from constant exposure to the elements and become scratched due to impacts.

It is your own responsibility to ensure that the use of the LED retrofit lights complies with applicable local legal requirements.

Glossary

AirCool technology
Smart cooling system that diverts heat away from the light's critical components (active cooling with a fan).

AirFlux technology
Optimal thermal management resulting in longer lifetime (passive cooling using heat sink).

Asymmetrical beam pattern
An offset beam pattern for low-beam applications. Provides a longer beam in the lane of traffic, which avoids blinding oncoming traffic.

Automotive Grade Quality
The Philips Automotive Grade Quality products are designed and developed following strict quality control processes (including applicable ISO norms), leading to consistently high production standards.

Ballast
The electronic driver that controls a xenon HID bulb.

Base
Bottom part of the bulb which ensures a proper mechanical and electrical connection with the lamp unit of the car. Its precision is important for a correct beam pattern.

Board voltage
Electrical voltage in the board net of the vehicle. In cars, the operational voltage at the bulb connector typically varies between 13 and 14 volts (V). The official test voltage for halogen headlight bulbs is 13.2V according to ECE R37. For trucks with a 24V board net the test voltage is 28V. The board voltage has a significant impact on filament bulb lifetime. In general, a 5% voltage increase reduces the lifetime by 50%.

Burner
Burner is the glass part of a halogen or xenon HID bulb in which the light emission is generated. It consists of hard or quartz glass and contains the filament and the two electrodes.

Candela (cd)
Unit of luminous intensity that measures the amount of luminous power emitted by a light source in a particular direction.

CeraLight
Cooling system using ceramic material for enhanced heat and vibration resistance.

Color temperature
Thermal measure for light color. Derived from the color emitted by a "black body" which is heated up to a certain temperature (see also Kelvin).

Cut-off zone
The line between the bright and dark zones of low beam light. Above the cut-off zone the amount of light is limited in order to avoid blinding oncoming traffic.

D(...)
Nomenclature for xenon HID bulbs where **D** stands for "discharge." Available technical types: **D1S, D1R, D2S, D2R, D3S, D3R, D4S, D4R** and **D5S**.
D1 and **D2** First bulbs introduced in 1991
D3 and **D4** Mercury-free bulbs that replace D1 and D2

For D1 and D3, the electronic high-voltage starter is already integrated in the bulb base. The **S** type is used with projector (lens) systems. Version **R** is used in open reflectors and features an additional coating on the outer tube (pinstripe) which blocks out some areas to avoid glare.
The **D5S** is a 25-watt bulb with integrated starter and integrated ballast.

Discharge bulb
The correct, technical term of the so-called xenon bulb is **high-intensity discharge** bulb. The light is emitted by an electric arc which is produced between two electrodes.
See also HID and xenon light.

DOT
The United States Department of Transportation which oversees federal highway, air, railroad, maritime and other transportation administration functions. It fulfills a role similar to the Economic Commission for Europe (ECE).

DRL
Daytime Running Lights.

ECE
Economic Commission for Europe. One of five regional commissions of the United Nations (UN) based in Geneva that contributes to enhancing the effectiveness of the UN through the regional implementation of outcomes of global UN Conferences and Summits. The ECE is responsible for harmonizing technical specifications for vehicles whose regulations are also mandatory in many countries outside Europe.

ECE R
This stands for the ECE Regulation.
Examples for vehicle lighting:
R37 Filament lamps
R99 Gas-discharge light sources
R48 Installation of lighting and light-signaling devices

Electric arc
The connecting luminous discharge between the two electrodes of a xenon HID bulb. This is similar in principle to a bolt of lightning. The electric arc is created by the high-voltage starter and stabilized and controlled by the ballast.

Electrodes
Electrical conductors which are positioned opposite each other in the vessel of a xenon gas-discharge bulb. The electric arc, which emits light, is produced between the electrodes.

EMI conform
Automotive standards of electromagnetic interference.

E-mark
The ECE mark of approval. The digit following the "E" indicates in which country the approval has been granted. For example: E1 indicates Germany and E2 indicates France. An approval granted by one ECE member is valid for all member states and is typically adopted by national regulations. Single minor deviations are possible.

Festoon
A tube-shaped bulb with contacts at each end such as C5W, which is commonly used for interior and license plate lighting.

Filament
A coiled tungsten wire that emits light.

H(...)
Nomenclature for halogen bulbs. H = halogen.
The bulbs are numbered consecutively.
The most common types are:
H1 First halogen bulb (single filament).
H4 Double filament for both low beam and high beam application in one headlamp unit.
H7 Most common halogen bulb in Europe for low beam, high beam, and fog lighting.

Halogen
A gas that is used to create the halogen cycle process in a light bulb. During operation the tungsten molecules evaporate from the tungsten. In the cycle process they combine with the halogen molecules and fall back to the wire. This extends the lifetime of a bulb and allows operation at a higher intensity. Halogen bulbs contain a high-pressure halogen filling. Non-halogen incandescent bulbs often use a vacuum.

HB(...)
ECE name of original North American bulb types which were approved for use in Europe as well. For example: HB3 refers to 9005 and HB4 refers to 9006.

Hg
Symbol for mercury (Latin: hydrargyrum). Xenon bulb types D1 and D2 still contain approximately one third of the amount of mercury as a normal domestic energy-saving bulb. D3, D4 und D5 are completely mercury free.

HID
High Intensity Discharge. Correct technical name for a so-called xenon bulb.
See also gas-discharge bulb, xenon light, xenon system.

High-voltage starter
Creates high-voltage pulses of approximately 20 000 volts to ignite the electric arc in a xenon HID bulb.

HiPerVision
Very compact signaling-bulb range with high-precision filaments and a long lifetime. For use in signaling lights, fog lamps, rear and daytime running lights.

Illuminance (lux)
Contrary to luminous flux (lumen), which is a measure of the total amount of light emitted by a light source, illuminance describes the amount of luminous flux per unit area, such as on the road. This is measured with a lux meter.

IP certification
Dust ingress and splash water protection improving durability.

Kelvin (K)
A unit of measure of temperature based upon an absolute scale whereby zero (minus 273° C) represents the point where all thermal motion ceases. In lighting, however, this is a measure of color temperature. The higher the color temperature, the whiter and cooler the light appears.

LED
Light Emitting Diode.

Lifetime
Statistical data that indicate the failure rate of a percentage of bulbs operated at a specific voltage over a certain period of time. Common lifetime data indication:
B3 Time when statistically 3% of the test samples have failed
TC Time when 63% of the test samples have failed.

Luminance
The intensity of light emitted from a surface per unit area in a given direction from, for example, the filament or the electric arc of a xenon HID bulb. An important indicator of the amount of light a headlamp unit provides on the road. The unit is candela/m^2 (cd/m^2).

Lumen (lm)
Unit of luminous flux.

Luminous flux (lumen)
The total amount of light that is emitted by a light source in all directions.

Lux (lx)
Unit of illuminance. 1 Lux = 1 lm/m^2.
See also Illuminance.

Lux meter
Illuminance measuring device.

LUXEON®
Lumileds LED chips technology.

Pb
Symbol for lead (Latin: plumbum).
All Philips automotive bulbs are **lead-free**.

Quartz glass
Temperature and pressure resistant glass for halogen and xenon HID bulbs. The glass also has a special coating to block out harmful ultraviolet (UV) light.

SafeBeam technology
Technology that projects the light exactly where you need it on the road.

Tungsten
Filament and electrode material.

UV-block
Ultraviolet (UV) rays blocking glass absorbs the UV light created by the filament or the electric arc. UV block is mandatory for all ECE complying car bulbs because UV light can damage the plastic cover of the headlamp.
See also Quartz glass.

Wedge base
Bulb with a glass base, such as W5W. Mainly used for position lights, side indicators and interior lighting.

Xenon (Xe)
One of the noble gases. Commonly used to refer to HID bulbs.

Xenon light
Headlights with HID bulbs.
See also D(...), Discharge bulb, HID.

Xenon system
A complete xenon system consists of the HID bulb, the high-voltage starter and the electronic ballast which controls the electric arc.

Understanding Philips ordering codes

All our automotive lighting products can be ordered using **Philips Order Entry**.
With Philips Order Entry you can identify the **lamp type**, the **product range** and the **packaging type.**

Example: **12972WVUB1**, H7 WhiteVision ultra, single blister

12972	WVU	B1
1/ Lamp type	2/ Range type	3/ Packaging type

1/ Lamp type

Every **lamp type** is designated by Philips with a unique number called lamp type.
- All 12V lamps start with 12 (for example: 12972 for H7 12V)
- All 24V lamps starting with 13 (for example: 13972 for H7 24V)

2/ Range type

Most lamp types are available in different product **ranges**.
These are indicated by a **color code**, to indicate the availability of a lamp in a specific product range.

3/ Packaging type

Commercial pack
Material carton
Contents C1 1 lamp
Contents CP 10 lamps
Packaging type C1/CP

Single blister
Material carton/plastic
Contents 1 lamp
Packaging type B1

Double blister
Material carton/plastic
Contents 2 lamps
Packaging type B2

Special pack
Material plastic
Contents S2 2 lamps
Contents SM 4 lamps
(2 headlamps,
2 position lamps)
Packaging type S2/SM

Xenon single blister
Material carton/plastic
Contents 1 lamp
Packaging type S1

LED X1/X2 blister
Material carton/plastic
Contents X1 1 lamp
Contents X2 2 lamps
Packaging types X1/X2

Color code

RacingVision GT200 Up to 200% brighter light	Range type **RGT**	
X-tremeVision Pro150 Up to 150% brighter light	Range type **XVP**
