

Microsoft® OS patching

An essential component of Philips Software Evolution Services*

Security by design

At Philips, we take an end-to-end approach to security. Infusing security principles begins with product design and development, and extends through testing and deployment. We follow-up on your system's safety with robust policies and procedures for monitoring, updating and managing incident responses, when needed.

Connectivity matters

Philips Software Evolution Services are designed for connectivity to accelerate an appropriate response.

Automated connectivity for seamless protection is a built-in feature of your Software Evolution Services including:

- Microsoft OS patching
- PIC iX application patching (*fixes)

The impact of cybercrime is astounding

Healthcare is primary target
A healthcare record lost or stolen could cost as much as

\$363
per record to remediate¹

The cost of cybercrime
2 trillion
by 2019²

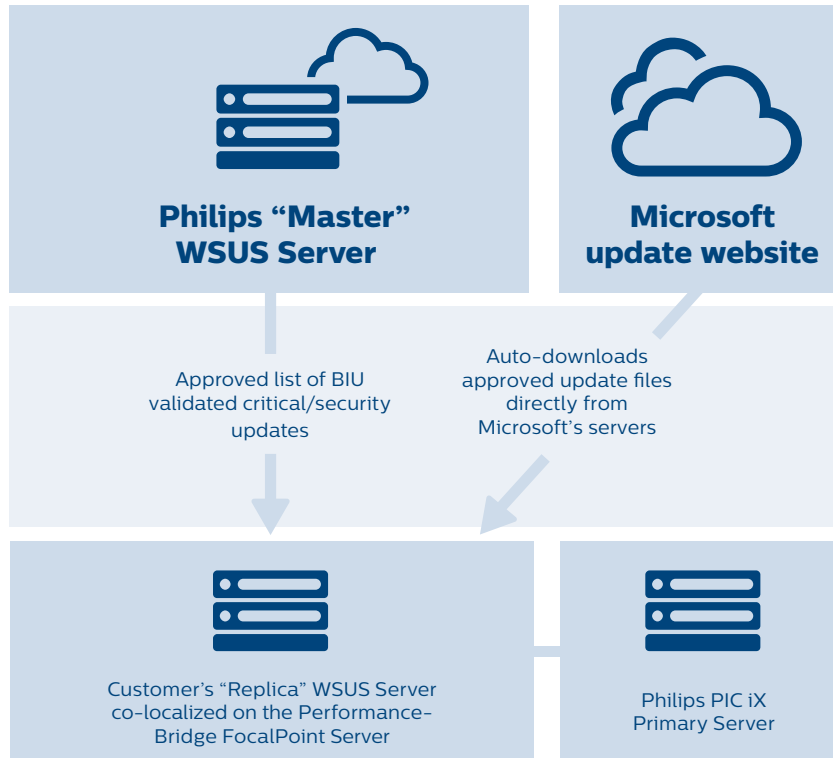

*This offering is available to purchase as a stand alone service.

WSUS enablement

- Software Evolution Services customers get Philips-enabled Windows Server Update Services (WSUS) co-localized on the PerformanceBridge Focal Point server
- You can choose the frequency and the timing to apply the validated patches based on their risk profile
- Microsoft OS patching bolsters your security

Philips delivers

- Testing and validation of Microsoft patching
- Support in patch delivery mechanisms
- Project management and field resource support for onsite coordination*
- Dedicated Philips team, technology and service to drive success*

* With purchase of additional support services

Philips next generation Software Evolution Services keep you one step ahead every step of the curve in **managing IT risk (cybersecurity via security patching)**, ensuring staff preparedness in managing life-and mission-critical platforms. With Philips, you can standardize on quality patient monitoring and protecting your investments.

Security

Reliability

Compliant

Optional services*

Proactive patching

- Philips informs customer that the latest validated patches are available
- Onsite Philips resources are scheduled to support application of Microsoft OS critical updates and application patching for PIC iX
- Coordinated change management with hospital staff to limit downtimes
- Reporting/documentation on file of patches applied
- Onsite support services, up to 4 times a year

Responsive patching

- Additionally, two event-based (emergency patching) at no additional cost
- Coordinated PIC iX application patching for "fixes"

* Additional costs for optional services.
