

Giving providers what they need

Philips Respironics System One REMstar SE

Designed around your needs

Philips Respironics took input from home care providers and developed a device to meet the demands of an evolving Sleep industry. As an extension of the proven System One family, the REMstar SE rounds out the System One line by providing a robust set of features in one affordable unit. Now, most of your patients can enjoy many of the same comfort benefits, including:

- Flex pressure relief
- Enhanced humidification with rain out protection and Heated Tube option
- Modem and SD card capable

Simplicity at its best

System One REMstar SE offers users simplicity and ease of use through its intuitive, icon-based interface. Philips provides cost savings to home care providers by offering one family of devices with common components such as filters, tubing, humidifiers and more.

sense and simplicity

Flex and System One Humidity Control for enhanced comfort

Philips Respironics Flex technology has become our clear standard for pressure relief therapy.

A more natural way of breathing

Flex technology helps make PAP therapy more natural by sensing when the patient is exhaling and reducing pressure at those times to make breathing more natural and comfortable.

More comfort with our rainout protection

System One Humidity Control delivers high humidity and ultimate comfort to the patient, while also reducing rainout, even in changing environmental conditions.

A heated hose option is also available to provide more humidity even in cold environments.
