TrueBlue gel mask with Auto-Seal Technology

**PHILIPS**

RESPIRONICS

# Appealing, forgiving, comfortable

## TrueBlue gel mask with Auto-Seal Technology

The mask is a crucial determinant of Positive Airway Pressure (PAP) **treatment acceptance**. Common reasons for non-adherence include pressure intolerance and issues related to the mask, such as facial discomfort, skin injury, and significant air leaks.<sup>1</sup>

The **TrueBlue** mask combines the **best-in-class gel material** and the **Auto-Seal technology** to provide an immediate seal with fewer adjustments.

## Forgiving

**Reference**  
1 Elliott. The interface: crucial for successful noninvasive ventilation. Eur Resp J 2004

## Appealing

**TrueBlue** mask's low profile design decreases overall footprint and face coverage.

The touch and feel of the **TrueBlue** mask is extremely soft and pleasant.

**TrueBlue** clear polycarbonate frame improves patient's line of sight.

## Comfortable

Traditional mask design is known to create uncomfortable pressure points.

**TrueBlue** gel cushion and the silicone membrane create a system that yields greater comfort.

**TrueBlue** gel helps prevent leaks by better conforming to the bone structure and contour of the face.

Our **premium blue gel** provides extra stability and is thinner and lighter than ever before.

The ultra-thin, form-fitting outer support **silicone membrane** creates an effective, self-adjusting, leak-free seal.

# TrueBlue ordering information

TrueBlue		
TrueBlue mask with exhalation port	Size	Part number
TrueBlue mask	P	1071838
TrueBlue mask	S	1071839
