Promoting venous and lymphatic health

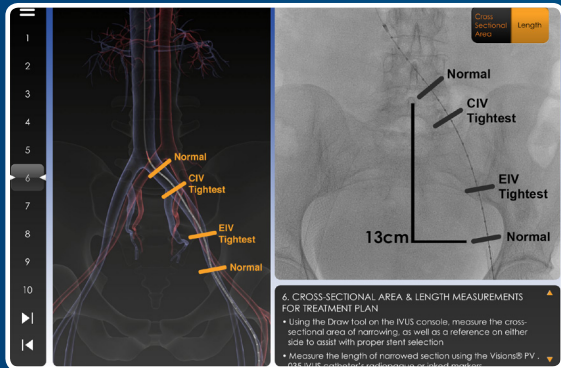

Search for Venous IVUS

**PHILIPS**

The Venous IVUS App from Philips Volcano and the American Venous Forum is the first app that lets you move a virtual IVUS catheter through the body while viewing real-world IVUS recordings, enabling you to easily identify anatomical structures and landmarks.

## Features:

- IVUS pullback simulations and measurements using the interactive workflow
- Image interpretation guide
- Access further information through the links and references
