

Professional MASTER LEDspot MV range

Recommended dimmer compatibility list for Mains Voltage lamps

KEY

x - y	Excellent dimming with x - y lamps, lamps can reach deep dim levels (below 10%)
x - y	Dimmer is compatible with x - y lamps, however might not be suitable for applications that require very deep dim levels below 10%. Minimum dim level with the indicated dimmer will be somewhere between 10%-30%
x - y	Potential risk with flickering, limited dimming levels/range or unexpected behavior
	Dimmer lamp combination not tested, or not applicable/relevant

This document is for information purposes and must be treated as recommendation. Philips attempted to provide best results, results are generated in lab conditions and might contain faults

- Note :
- #1) t.b.d. fields are still under evaluation and will be published in Sept update.
 - #2) Unexpected behaviour can occur outside the range of specified number of lamps.
 - #3) Occupancy sensors can act like dimmers, therefore Philips recommend to use dimmable lamps in combination with it.

Philips will not accept claims for any damage caused by implementing the recommendations in this document.
