## IMPORTANT INFORMATION

---

### Warnings and Notices

When using electrical equipment, basic safety precautions should always be followed including the following:

- a. **READ AND FOLLOW ALL SAFETY INSTRUCTIONS.**
- b. Do not use outdoors.
- c. Do not mount near gas or electric heaters.
- d. Equipment should be mounted in locations and at heights where it will not readily be subjected to tampering by unauthorized personnel.
- e. The use of accessory equipment not recommended by the manufacturer may cause an unsafe condition.
- f. Do not use this equipment for other than intended use.
- g. Refer service to qualified personnel.

**SAVE THESE INSTRUCTIONS.**

**WARNING:** You must have access to a mains circuit breaker or other power disconnect device before installing any wiring. Be sure that power is disconnected by removing fuses or turning the mains circuit breaker off before installation. Installing the device with power on may expose you to dangerous voltages and damage the device. A qualified electrician must perform this installation.

**WARNING:** Refer to National Electrical Code® and local codes for cable specifications. Failure to use proper cable can result in damage to equipment or danger to personnel.

**WARNING:** This equipment is intended for installation in accordance with the National Electric Code® and local regulations. It is also intended for installation in indoor applications only. Before any electrical work is performed, disconnect power at the circuit breaker or remove the fuse to avoid shock or damage to the control. It is recommended that a qualified electrician perform this installation.

### Additional Resources for DMX512

For more information on installing DMX512 control systems, the following publication is available for purchase from the United States Institute for Theatre Technology (USITT), "Recommended Practice for DMX512: A Guide for Users and Installers, 2nd edition" (ISBN: 9780955703522). USITT Contact Information:

# PREFACE

---

## 1. About this Manual

The document provides installation and operation instructions for the following products:

- SL ePAR 180 LED Luminaire

Please read all instructions before installing or using this product. *Retain this manual for future reference.* Additional product information and descriptions may be found on the product specification sheet.

---

**Note:** The SL ePAR 180 LED Luminaire is universal voltage 100 to 240 VAC (auto-ranging).

---

## 2. Included Items

Each SL ePAR 180 LED Luminaire includes the following items:

- SL ePAR 180 LED Luminaire
- PC1BE - AC Power Input Cable (39 inches / 1 metre)
- Installation and User's Manual (*this document*)

## 3. Accessories

Contact your Authorized Showline Dealer for prices and availability of all accessories for SL ePAR 180 LED Luminaires.

# SL ePAR 180 LED Luminaire Overview

## 1. SL ePAR 180 LED Luminaire Components

### Common Luminaire Components

**Figure 1: SL ePAR 180 LED Luminaire Components**

## LCD Display / Menu System

Figure 2: LCD Display & Menu System

**Note:** For Menu operation and programming details, refer to the "LCD Display and Menu System" on page 9.

# INSTALLATION AND SET UP

## 1. Power Requirements

The SL ePAR 180 LED Luminaire operates on AC input voltages from 100 to 240 VAC.

**WARNING!** This luminaire does not contain an ON/OFF switch. Always disconnect the power input cable to completely remove power from the luminaire when not in use.

### AC Power Operation

When connected to an AC source, the luminaire operates on 100 to 240 volts AC (+/- 10%, auto-ranging). The luminaire contains an auto-ranging power supply. Each luminaire can draw up to 180 Watts.

Table 1: SL ePAR 180 Voltage (VAC) vs. Current\*

Voltage (AC)	Total Current (A)	Voltage (AC)	Total Current (A)
100	1.80	180	1.0
110	1.63	190	0.95
120	1.50	200	0.90
130	1.38	210	0.86
140	1.29	220	0.82
150	1.20	230	0.78
160	1.13	240	0.75
170	1.06		

**Warning!**

Do not overload circuits!

To reduce the risk of electrical shock or fire, do not expose this luminaire to rain or moisture.

Don not stare at the light of this luminaire, the bright light can damage the eyes.

## 2. Connecting Power

Direct connection to a AC power source using an AC input cable.

A total of 3 wires/conductors need to be brought to the luminaire. The following wiring scheme is required:

**Table 2: SL ePAR 180 LED Luminaire AC Input Connections**

Wire Colour	Purpose
Brown	Main / Line(100 to 240VAC)
Blue	Neutral
Green/Yellow	Ground(Earth)

Note: It is recommended that all the wiring works must be conducted by a qualified person.

## 3. Connecting to the DMX 512 Network

Basic DMX512 installation consists of connecting multiple SL ePAR 180 LED Luminaires together (up to 32 luminaires) in a "daisy-chain" fashion. A cable runs from the control console (or DMX512 control source) to the DMX connector on the first SL ePAR 180 LED Luminaire. Another cable runs from the other DMX connector on the first luminaire to a DMX connector on the next SL ePAR 180 LED Luminaire (or DMX512 device to be controlled).

**Figure 3: SL ePAR 180 LED Luminaire DMX512 Input / THRU Connections**

**Note:** For more information on DMX512 networking and systems, refer to ["Additional Resources for DMX512"](#) on [page 1](#). For SL ePAR 180 LED Luminaire DMX Mapping, refer to ["DMX CONTROL"](#) on [page 14](#).

Figure 4: SL ePAR 180 LED Luminaire - DMX512 Connections

## 4. Mounting Luminaire

### Floor Mounting

The SL ePAR 180 LED Luminaire is designed to sit directly on its yoke assembly in a floor installation application. When used in this type of application, loosen the locking handle securing the inner portion of the yoke assembly and separate out (as shown in **Figure 5**). Be sure to leave enough space around the luminaire to allow proper, uninterrupted airflow for cooling.

Figure 5: Floor Mounting

### Truss / Hanging Applications

The SL ePAR 180 LED Luminaire is provided with the ability to hang via truss hooks, clamps, etc. (sold separately). Simply attach hook, clamp, etc. to the SL ePAR 180 LED Luminaire enclosure assembly in the provided M10 holes. It is recommended (and may be required by local and national safety codes) to use and install a safety cable (sold separately) as illustrated in **Figure 6**. When hanging the fixture, be sure to leave enough space around the luminaire to allow proper, uninterrupted airflow for cooling and positioning. Refer to "[Luminaire Dimensions](#)" on page 35 for spacing (dimensional) requirements.

Figure 6: Mounting the Fixture - Hanging Applications

## OPERATION AND PROGRAMMING

### 1. LCD Display and Menu System

#### SL PAR 150 RGBW LED Luminaires

The SL ePAR 180 LED Luminaire's LCD Display and Menu System provides local control for accessing the following settings:

- Presets (Standard and User Defined)
- Colour Filters
- Effects (Chases - preloaded and user defined)
- Strobe / Timing
- Fixture Settings
- Fixture Lockout (to prevent changes)
- Password Setting
- Current Fixture Operational Status
- Setting the DMX512 Address

**Note:** If there are multiple luminaires in a system, changes would need to be made at each LCD Menu as desired. For the SL ePAR 180 LED Luminaire menu structure, see "[SL ePAR 180 LED Luminaire Menu Tree](#)" on page 11.

Upon power up, the LCD will display the main screen display menu of SL ePAR 180 LED Luminaire. Press “<” or “>” to select the press “OK” to enter the desired function menu.

Figure 7: LCD Display and Menu System

## 2. LCD Display and Menu System Operation

The LCD Display Menu system consists of several categories. Upon power up, the LCD will display the main menu automatically. When the desired menu item is reached, press the OK button to display the menu options and to navigate and configure the menu options as required.

### To navigate and access the menu settings/selections:

- Step 1. Make sure the luminaire is powered and turned on.
  - Step 2. Press the desired button to access the menu categories.
  - Step 3. Use the “<” and “>” arrow buttons to navigate through the various options and settings.
  - Step 4. Make changes as desired.
- Press the “OK” button to accept changes.

### Preset

#### To edit and save a preset:

- Step 1. Press the “OK” button to access the Preset menu.
- Step 2. Use the LEFT and RIGHT arrow buttons to scroll through all presets and select the desired preset number(0 thru 31).
- Step 3. Press the “OK” button to select the desired menu. In RGB mode, the user can select **Intensity, Red, Green, B(Blue) and White**, and in HSIC mode, user can select menus among **Master Intensity, Hue, Saturation, Intensity and CCT**.
- Step 4. Once at the desired preset, use LEFT and RIGHT arrow buttons to adjust the parameter value as desired. Once all values are adjusted as desired, press the OK button.
- Step 5. Press the OK button to select Save a Preset, the screen will then display “Current Preset” and “Save to Preset”. Use the LEFT and RIGHT arrow buttons to make a selection, then press the OK button.
- Step 5. The preset is now saved. Press the ESC button to exit the current menu.

### Color Filter

- Step 1. Press the OK button to access the Colour Filter menu.
- Step 2. Use the LEFT and RIGHT arrow buttons to scroll through all menus.
- Step 3. Select the Colour Filter number(0-43) and press the OK button to access the menu.
- Step 4. Once at the desired menu, use the LEFT and RIGHT arrow buttons to adjust the parameter value of Master Intensity. Once all values are adjusted as desired, press the OK button.
- Step 5. The Colour Filter is now saved. Press the ESC button to exit the current menu.

## Chase

- Step 1. Select Edit a Chase and press the OK button to access the Chase menu.
- Step 2. Use the LEFT and RIGHT arrow buttons to scroll through all menus.
- Step 3. Select the Built-in Chase X(1-10) or user Chase(1-8), then press the OK button to select the desired menu.
- Step 4. Once at the desired menu, use the LEFT and RIGHT arrow buttons to adjust the parameter value as desired. Once all values are adjusted as desired, press the OK button.
- Step 5. The Chase is now saved. Press the ESC button to exit the current menu.

## Strobe/Timing

- Step 1. Press the OK button to access the Strobe/Timing menu.
- Step 2. Use the LEFT and RIGHT arrow buttons to scroll through all menus.
- Step 3. Press the OK button to select the desired menu from **Intensity, Strobe X(0-255), Duration(0-85), Intensity Timing(0.2 S-60Min) and Color Timing(0.2 S-60 Min)**.
- Step 4. Once at the desired menu, use the LEFT and RIGHT arrow buttons to adjust the parameter value as desired. Select Strobe X(0-2) means Open, Strobe X(3-5) means Close, and Strobe X(5-255) means Strobe Mode. Once all the values are adjusted as desired, press the OK button.
- Step 5. The Strobe/Timing is now saved. Press the ESC button to exit the current menu.

## Settings

- Step 1. Press the OK button to access the Settings menu.
- Step 2. Use the LEFT and RIGHT arrow buttons to scroll through all menus.
- Step 3. Press CHECK MARK(OK)button to select the desired menu from **General, Factory Default, DMX and Display**.
- Step 4. Once at the desired menu, use the LEFT and RIGHT arrow buttons to adjust the related fixture information. Once all values are adjusted as desired, press the OK button.
- Step 5. The Setting information is now saved. Press the ESC button to exit the current menu.

## Status

### To check the fixtures' operational status:

- Step 1. Press the OK button to access the Status menu.
- Step 2. Use the LEFT and RIGHT arrow buttons to scroll through all the menus.
- Step 3. Press the OK button to select the desired menu from **LED Current Level, Temperature, and Other Info**.
- Step 4. Once at the desired menu, use the LEFT and RIGHT arrow buttons to check the related fixture information.

Note: For more information about Preset, Colour Filter, Chase, Strobe/Timing, Settings and Status, please refer to "SL ePAR 180 LED Luminaire Menu Tree" on page 11.

### 3. SL ePAR 180 LED Luminaire Menu Tree

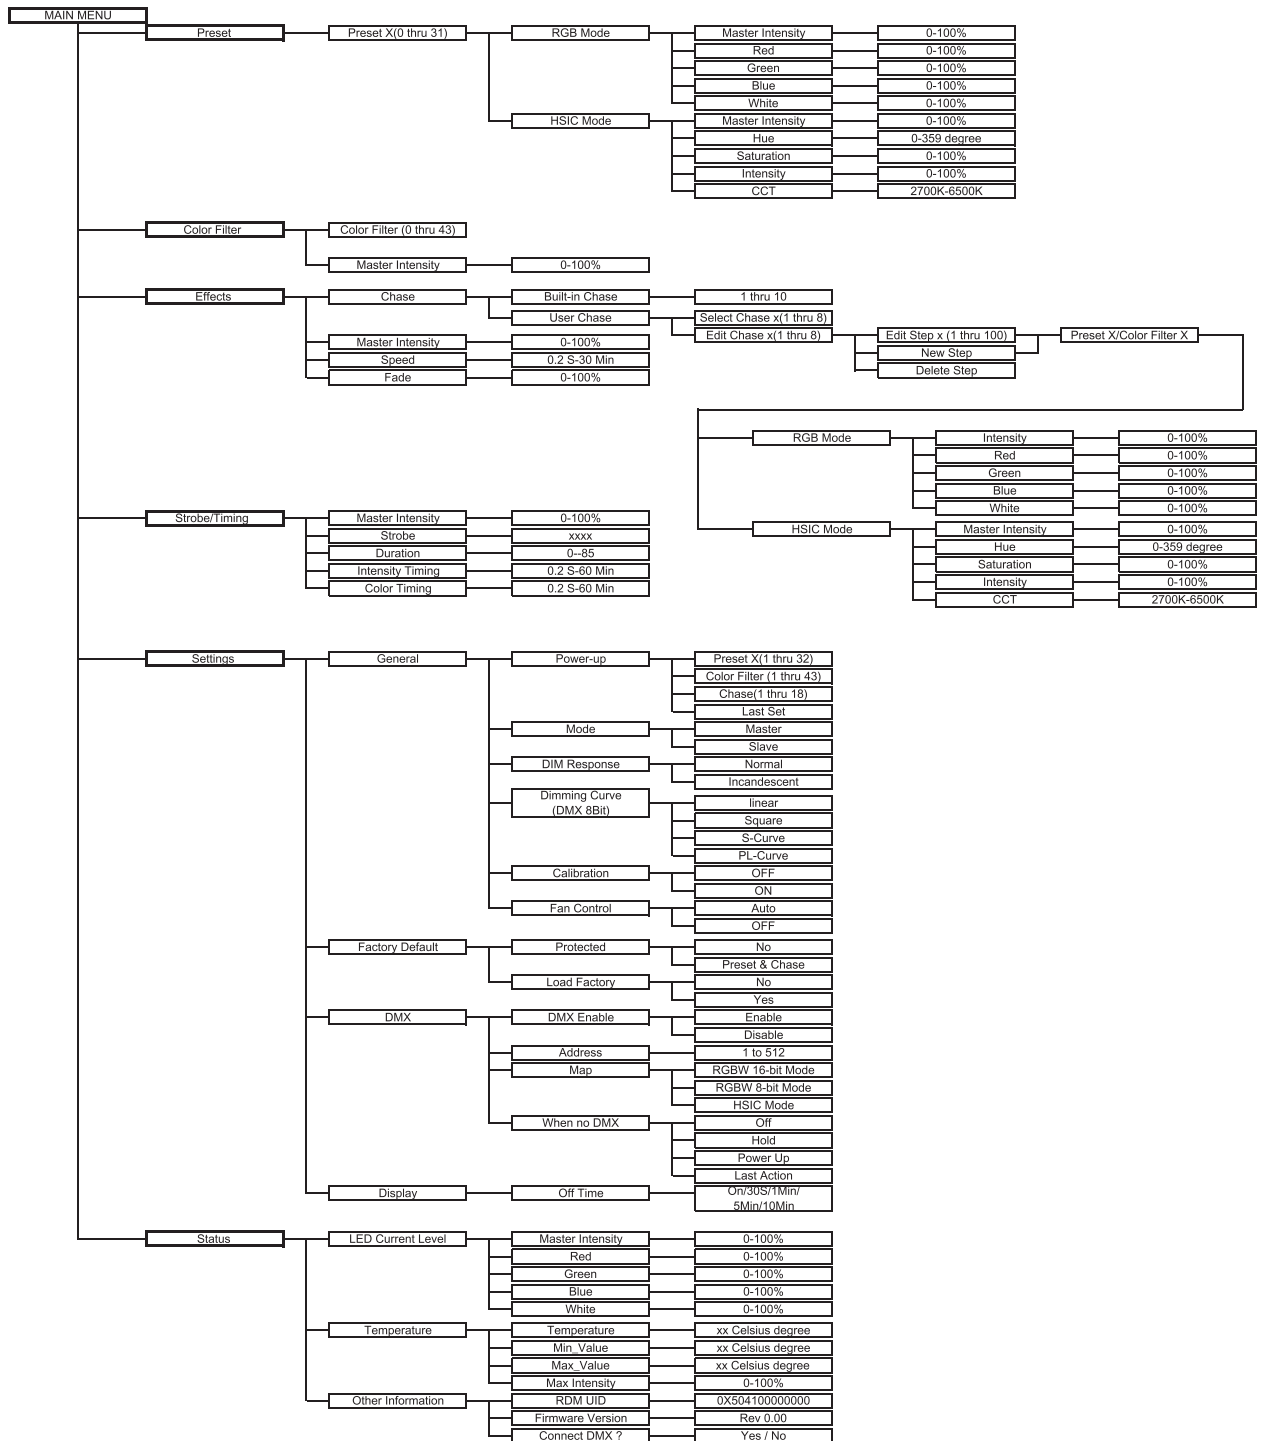

Figure 8: SL ePAR 180 LED Luminaire Menu Tree

## 4. Dimming Curve Selection

Through the menu, you are able to select one of four dimming curves:

- Linear Curve
- PL\_Curve
- S\_Curve
- Square Curve

Figure 8: SL ePAR 180 LED Luminaire Dimmer Curves

## 5. Master / Slave Operational Mode

The Master / Slave Operational Mode allows one SL ePAR 180 LED Luminaire to act as the “Master” luminaire and all other connected luminaires are controlled by this luminaire. When a luminaire is set to “Slave” mode, it will only listen to and follow any commands send from a “Master” luminaire. Only one “Master” luminaire is allowed in this type of operation.

### To setup a master / slave network:

- Step 1. Set the first device in the DMX512 chain to **Master Mode** through the luminaires' menu system.
- Step 2. Set all other connected luminaires to **Slave Mode**.
- Step 3. The master luminaires can be controlled via DMX512, RDM or through standalone operation (self-contained network utilizing on-board effects). The slave luminaires will mimic the master luminaires' operation in all cases.

---

**Note:** For more information on DMX512 networking and systems, refer to “[Additional Resources for DMX512](#)” on page 1. For SL ePAR 180 LED Luminaire DMX Mapping, refer to “[DMX CONTROL](#)” on page 14.

---

**Figure 10: SL ePAR 180 LED Luminaire - Master / Slave Configuration**

## DMX CONTROL

This section contains information for operating the luminaire using DMX control in 16-bit, 8-Bit, or HSIC (Hue, Saturation, Intensity and Colour Correction) modes. For Menu options and detailed information, see "LCD Display and Menu System" on page 8 .

**Note:** These tables assume a DMX start address of 1. When a different starting address is used, this address becomes channel 1 function and other functions follow in sequence.

### 1. SL ePAR 180 LED Luminaire DMX Mapping

#### 16-Bit Mode

Table 3 provides DMX channel mapping of all DMX512 control values when the SL ePAR 180 LED Luminaire is in 16-bit DMX512 mode (as set by the luminaires' menu system).

**Table 3: SL ePAR 180 LED Luminaire DMX Channel Mapping (16-Bit Mode)**

DMX Channel	Parameter	Range DMX	Range%	Default - recommended console default values	Description

## 2. DMX Timing Channel Detail

Timing channel control improves the timed moves of certain groups of parameters. The SL ePAR 180 LED Luminaire provides timing channels in 16-bit mode (one for intensity time and one for color time) and one timing channel in 8-bit (colour and intensity timing combined). The luminaire uses its timing channel value to calculate a smooth continuous operation for a given time and transition.

**Guidelines:**

- Timing channels support time values from zero to 60 minutes.
- To use a timing channel instead of console timing, it is recommended to set the timing channel to the desired value and set cue and/or console cue fade time to zero. A combination of time controls can produce unexpected results.
- The default value setting in the profile should be 255 (proportional control) to allow smooth operation when using console timing.
- The timing channel data should change as a snap. A zero value will give the fastest operation, however, without any smoothing this can appear "steppy" in console timed moves.

Refer to "DMX Timing Channel Detail" for more information.

## CLEANING AND CARE

---

**WARNING!** All cleaning should be performed with power completely removed from the luminaire. Never remove protective covers when the luminaire is powered. Wear appropriate protective eye wear and gloves when cleaning the fixture. All service and maintenance, other than described herein, should be performed by a qualified technician or Authorized Service Center.

---

### 1. Special Cleaning and Care Instructions

Being a solid-state fixture, and unlike most fixtures, the SL ePAR 180 LED Luminaire requires very little routine maintenance by the user. This section covers portions of the luminaire that can be removed for cleaning.

The SL ePAR 180 LED Luminaire requires special care when it comes to cleaning the front lens assembly. Additional care needs to be taken with the plastic components because they are much easier to scratch or damage than the glass lenses used in traditional luminaires.

The following is a list of cleaning materials required to care for your SL ePAR 180 LED Luminaire:

- Lint free lens tissue
- Lint or powder free gloves
- Reagent grade isopropyl alcohol\*
- A mild soap solution.

**Note:** \*Reagent grade isopropyl alcohol is good to use on the SL ePAR 180 LED Luminaire plastic optics with anti-reflection coatings.

---

If the lens is still dirty after using isopropyl alcohol, for instance if fingerprints or oil is just redistributed and not cleaned off the optic, then a mild soap and water solution can be used to gently wash the lens. Repeat the cleaning with isopropyl alcohol to eliminate streaks and soap residue.

---

**WARNING!** Under no circumstances should ammonia-based cleaners, acetone, or other harsh solvents be used on or near the SL ePAR 180 LED Luminaire. These types of cleaners or solvents can permanently damage the optics or housing of the fixture.

---

If you have any questions regarding the use or care of your SL ePAR 180 LED Luminaire, please contact Showline technical support or your local Authorized Dealer.

### 2. Front Lens Cleaning

#### To clean the front lens:

- Step 1. Turn off the luminaire and allow to cool completely.
- Step 2. Apply a small amount of reagent grade isopropyl alcohol to lint-free lens tissue.
- Step 3. Wipe all debris, dirt, fingerprints, etc. from lens.
- Step 4. Using a second lint-free lens tissue, wipe off any alcohol residue.

### 3. Service and Maintenance

For all other service and maintenance issues, please contact your local Showline office or an Authorized Service Center.

---

---

**WARNING!** Disassembly (other than as described herein), alterations, unauthorized service, etc. will void the product warranty. Contact your local Showline office or an Authorized Service Center for technical support and service.

---

---

#### 4. Accessories

Only Showline approved accessories should be used with your SL ePAR 180 LED Luminaire. For a list of available accessories from Showline, please see [“Accessories” on page 3](#). For questions regarding accessories, please contact your local Authorized Showline Dealer or Showline office.

## TECHNICAL SPECIFICATIONS

---

### 1. Operational Specifications

Source:	Colour RGB+Cool White Array (x19 High Power LEDs)
Beam Angle:	21 Degrees
Light Output:	> 4,400 lumens
Color Temperature:	2700 - 10,000K (user adjustable)
Input Voltage (AC):	100V to 240V (+/- 10%, auto-ranging)
Current (AC):	1.80 Amps (100V) / 0.75Amps (240V)
Power Consumption:	180 Watts (max.)
Frequency:	50/60Hz
Control Protocols:	DMX512 (1990) / DMX512A (RDM) / On-Board Menu
Ambient Temperature:	1 to 40 Degrees C (33 to 104 Degrees F)
Humidity:	35~85RH%
Cooling:	Forced Air
Housing:	Die Cast Aluminium with Powder Coating
Weight:	9.9 lbs(4.5 kg) - Luminaire only (no accessories)
Compliance:	CE Marked (International models)
IP Rating:	IP20

---

**Note:** Common model specifications shown. For specific model specifications, features, and accessories, refer to the product specification sheet for more details.
