IMPORTANT INFORMATION

Warnings and Notices

When using electrical equipment, basic safety precautions should always be followed including the following:

- a. **READ AND FOLLOW ALL SAFETY INSTRUCTIONS**
- b. Do not use outdoors.
- c. Do not mount near gas or electric heaters.
- d. Equipment should be mounted in locations and at heights where it will not readily be subjected to tampering by unauthorized personnel.
- e. The use of accessory equipment not recommended by the manufacturer may cause an unsafe condition.
- f. Do not use this equipment for other than intended use.
- g. Refer service to qualified personnel.

SAVE THESE INSTRUCTIONS.

WARNING: You must have access to a main circuit breaker or other power disconnect device before installing any wiring. Be sure that power is disconnected by removing fuses or turning the main circuit breaker off before installation. Installing the device with power on may expose you to dangerous voltages and damage the device. A qualified electrician must perform this installation.

WARNING: Refer to National Electrical Codes and local codes for cable specifications. Failure to use proper cable can result in damage to equipment or danger to personnel.

WARNING: This equipment is intended for installation in accordance with the National Electric Code® and local regulations. It is also intended for installation in indoor applications only. Before any electrical work is performed, disconnect power at the circuit breaker or remove the fuse to avoid shock or damage to the control. It is recommended that a qualified electrician perform this installation.

Additional Resources for DMX512

For more information on installing DMX512 control systems, the following publication is available for purchase from the United States Institute for Theatre Technology (USITT), "Recommended Practice for DMX512: A Guide for Users and Installers, 2nd edition" (ISBN: 9780955703522). PREFACE

1. About this Manual

The document provides installation and operation instructions for the following products:

- SL BEAM 100 LED Luminaire

Please read all instructions before installing or using this product. *Retain this manual for future reference.* Additional product information and descriptions may be found on the product specification sheet.

Note: The SL BEAM 100 LED Luminaire is universal voltage 100 to 240 VAC (auto-ranging).

2. Included Items

Each SL BEAM 100 LED Luminaire includes the following items:

- SL BEAM 100 LED Luminaire
- SL BEAM 100 Quick Start Guide

3. Accessories

SL BEAM 100 LED Luminaire Power Input Cables

Part Number	Description
17-003-0054-00	SL BEAM 100 LED Luminaire AC Power Input Cable (1.5 meter)

SL BEAM 100 LED Luminaire Accessories

Part Number	Description
60-600-0134-00	Camp Lock for SL BEAM 100 LED Luminaire

SL BEAM 100 LED LUMINAIRE OVERVIEW

1. SL BEAM 100 LED Luminaire Components

Major Luminaire Components

Top of Unit

Figure 1: SL BEAM 100 LED Luminaire Components

Note: *Mounts can be removed and reversed. See "[Mounting Luminaire](#)" on page 8 for more information.

LCD Display / Menu System

Figure 2: LCD Display & Menu System

Note: For Menu operation and programming details, refer to "LCD Display and Menu System" on page 9.

INSTALLATION AND SET UP

1. Power Requirements

The SL BEAM 100 LED Luminaire operates on AC input voltages from 100 to 240 VAC.

WARNING! This unit does not contain an ON/OFF switch. Always disconnect power input cable to completely remove power from unit when not in use.

AC Power Operation

When connected to an AC source, the unit operates on 100 to 240 volts AC (+/- 10%, auto-ranging). The luminaire contains an auto-ranging power supply. Each luminaire can draw up to 150 Watts.

WARNING! Maximum amount of units that may be daisy-chained is (A) 11 units 100 ~ 120VAC (15 Amps) or (B) 20 units 230 ~ 240VAC (15 Amps).

Table 1: SL BEAM 100 LED Luminaire Voltage (VAC) vs. Current*

Voltage (AC)	Total Current (A)	Voltage (AC)	Total Current (A)
100	1.50	180	0.83
110	1.36	190	0.78
120	1.25	200	0.75
130	1.15	210	0.71
140	1.07	220	0.68
150	1.00	230	0.65
160	0.93	240	0.62
170	0.88		

Note: For wiring of AC input connector, refer to "[Connecting SL BEAM 100 LED Luminaires to AC Power](#)" on page 6.

2. Connecting Power

Units can be powered in one of two ways:

- Direct connection to a AC power source using an AC input cable.
- Connection from the AC output of another SL BEAM 100 LED Luminaire. When using this method, it is very important not to connect any other type of equipment device.

WARNING! Only connect other SL BEAM 100 LED Luminaires to the AC Output (Thru) connector of a SL BEAM 100 LED Luminaire.

Connecting SL BEAM 100 LED Luminaires to AC Power

Figure 3 on page 7 describes how to connect power to your SL BEAM 100 LED Luminaire. Field wiring of the SL BEAM 100 LED Luminaire is straight forward. A total of 3 wires/conductors is supplied from the unit. The following wiring scheme is used:

Figure 3: SL BEAM 100 LED Luminaire AC Input & Output Connections

CAUTION: In the event the AC input cable of this luminaire is damaged, it must be replaced, by the user, with an approved cable through an Authorized Showline Dealer or Service Center.

3. Connecting to the DMX512 Network

Basic DMX512 installation consists of connecting multiple SL BEAM 100 LED Luminaires together (up to 32 luminaires) in "daisy-chain" fashion. A cable runs from the control console (or DMX512 control source) to the DMX connector on the first SL BEAM 100 LED Luminaire. Another cable runs from the other DMX connector on the first unit to a DMX connector on the next SL BEAM 100 LED Luminaire (or DMX512 device to be controlled).

Figure 4: SL BEAM 100 LED Luminaire DMX512 Input / Output Connections

Note: For more information on DMX512 networking and systems, refer to "Additional Resources for DMX512" on page 1. For SL BEAM 100 LED Luminaire DMX Mapping, refer to "DMX CONTROL" on page 14.

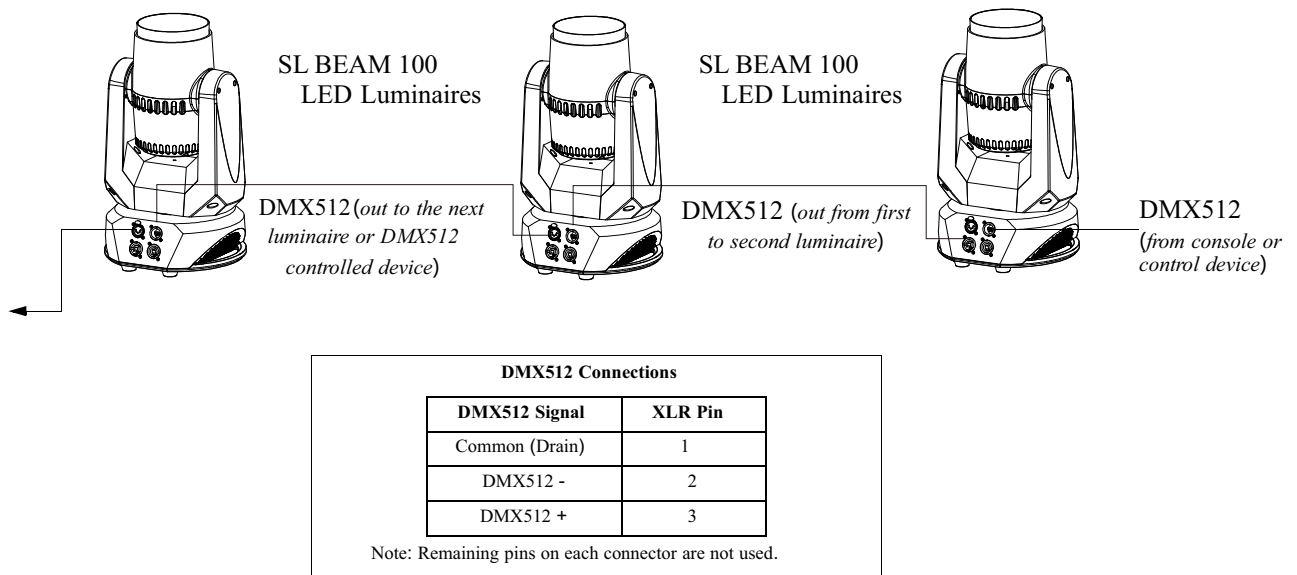

Figure 5: SL BEAM 100 LED Luminaire - DMX512 Connections

4. Mounting Luminaire

The SL BEAM 100 LED Luminaire is provided with two mounts and safety cable anchor points.

The two mounts are easily removed and reversed as required. These mounts are designed to accept a variety of mounting hooks, clamps, etc. for hanging applications. Refer to **Figure 6** for additional information. *Note, the bottom of the luminaire must be free and clear of any objects (i.e., scenery) to allow for proper airflow*
Simply attach hook, clamp, etc. to the SL BEAM 100 LED Luminaire mount assembly in the M13 hole.

Note: Mounting hooks, clamps, etc. are sold separately or by others. For available mounting accessories refer to "Accessories" on page 3.

Figure 6: Mounting Luminaire - Hanging Applications

OPERATION AND PROGRAMMING

1. LCD Display and Menu System

The SL BEAM 100 LED Luminaire's LCD Display and Menu System provides local control for accessing the following fixture's settings:

- Presets (Standard and User Defined)
- Color Filters
- Effects (Chases - preloaded and user defined)
- Strobe / Timing
- Settings
- Lock Fixture (to prevent changes)
- Password
- Status
- Setting the DMX512 Address

Note: If there are multiple luminaires in a system, changes would need to be made at each LCD Menu as desired.

Upon power up, the LCD will display the main screen showing the product type/name. If DMX is enabled, the programmed address will appear after power up.

Figure 7: LCD Display and Menu System

2. LCD Display and Menu System Operation

The LCD Display Menu system consists of several categories. Use the Menu Buttons to access and make changes to the menu items. When the desired menu item is reached, press the desired Menu Button to display the menu options and to navigate and configure the menu options as required.

To navigate and access menu settings/selections:

- Step 1. Make sure unit is powered and turned on.
- Step 2. Press the desired button (as shown in **Figure 7**) to access menu categories.
- Step 3. Use UP | DOWN | LEFT | RIGHT arrow buttons to navigate through the various options and settings.
- Step 4. Make changes as desired.
- Step 5. Press CHECK MARK (OK) button to accept changes.

SL BEAM 100 LED Luminaire Menu Tree

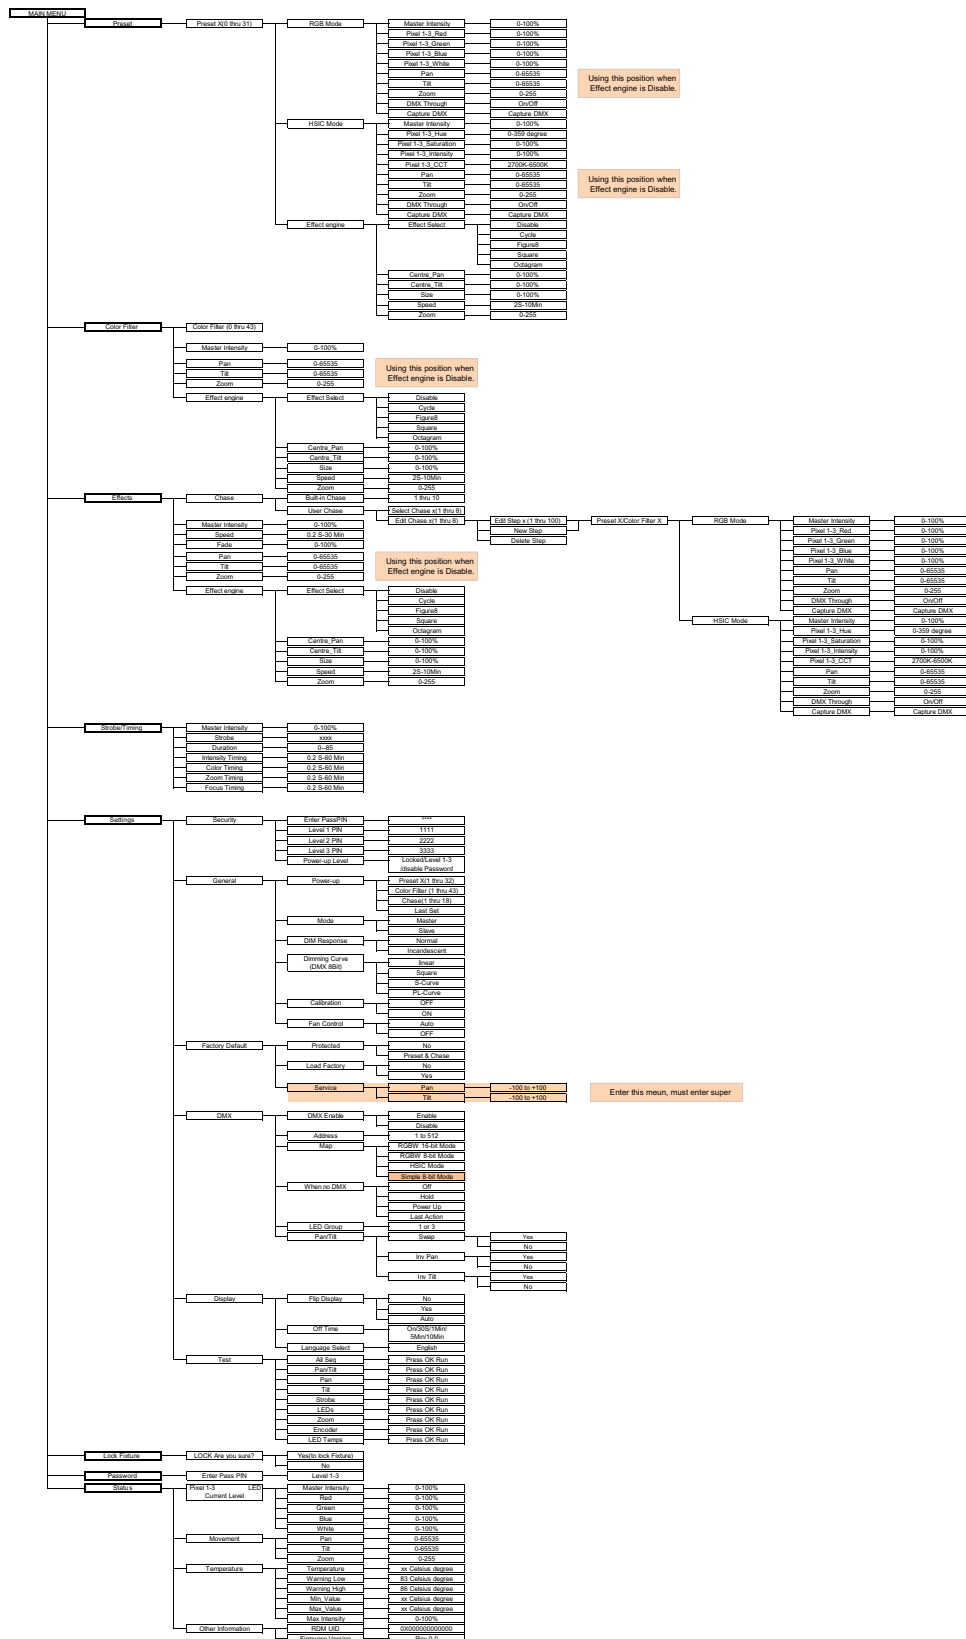

Figure 8: SL BEAM 100 LED Luminaire Menu Tree

3. Quick Selection Buttons

When in Manual Mode, the SL NITRO LED Luminaire's features can be accessed via the on-board LCD menu system or via three quick select buttons:

- Edit a Preset Button
- Edit a Chase Button
- DMX Address Button

Edit a Preset Button

To edit and save a preset:

- Step 1. Press Edit a Preset button. Current preset will be shown.
- Step 2. Use LEFT and RIGHT arrow buttons to scroll through all presets.
- Step 3. Once at desired preset, use UP and DOWN arrows to access (highlight) preset parameters. Once in desired parameter, use LEFT and RIGHT arrow buttons to adjust parameter value as desired.
- Step 4. Once all values are adjusted as desired, press OK (Check Mark) button.
- Step 5. Save preset menu option will appear. Use LEFT and RIGHT arrow button to select preset number.
- Step 6. If saving preset, press OK (Check Mark) button. Confirm choice.
- Step 7. Preset is now saved.

Edit a Preset

Edit a Chase Button

To edit and save a chase:

- Step 1. Press Edit a Chase button. Current chase will be shown.
- Step 2. Use LEFT and RIGHT arrow buttons to scroll through all chases (Built In and User Chases).

Edit a Chase

Note: For Built In Chases, only the Speed, the Master Intensity and Fade parameters may be changed and saved. For User Chases, Chase Number, Total Steps, Speed, and Fade Parameters may be changed and saved.

- Step 3. Once at desired chase, use UP and DOWN arrows to access (highlight) chase parameters. Once in desired parameter, use LEFT and RIGHT arrow buttons to adjust parameter value as desired.
- Step 4. Once all values are adjusted as desired, press OK (Check Mark) button.
- Step 5. Save chase menu option will appear. Use LEFT and RIGHT arrow buttons to select chase number.
- Step 6. If saving chase, press OK (Check Mark) button. Confirm choice.
- Step 7. Chase is now saved.

DMX Address Button

To edit and save a DMX address:

- Step 1. Press DMX Address button. Current DMX Address will be shown.
- Step 2. Press OK (Check Mark) button to highlight a digit in the DMX address.
- Step 3. Use LEFT and RIGHT arrow buttons to scroll through all digits.
- Step 4. Once at desired digit, use UP and DOWN arrows to change highlighted digit. Once digit is set, use LEFT and RIGHT arrow buttons to set other digits in DMX address.
- Step 5. Once all digits are set in DMX address, press OK (Check Mark) button.
- Step 6. DMX will display and is saved.

DMX Address

4. Dimming Curve Selection

Through the menu, you are able to select one of four dimming curves:

- Linear Curve
- PL_Curve
- S_Curve
- Square Curve

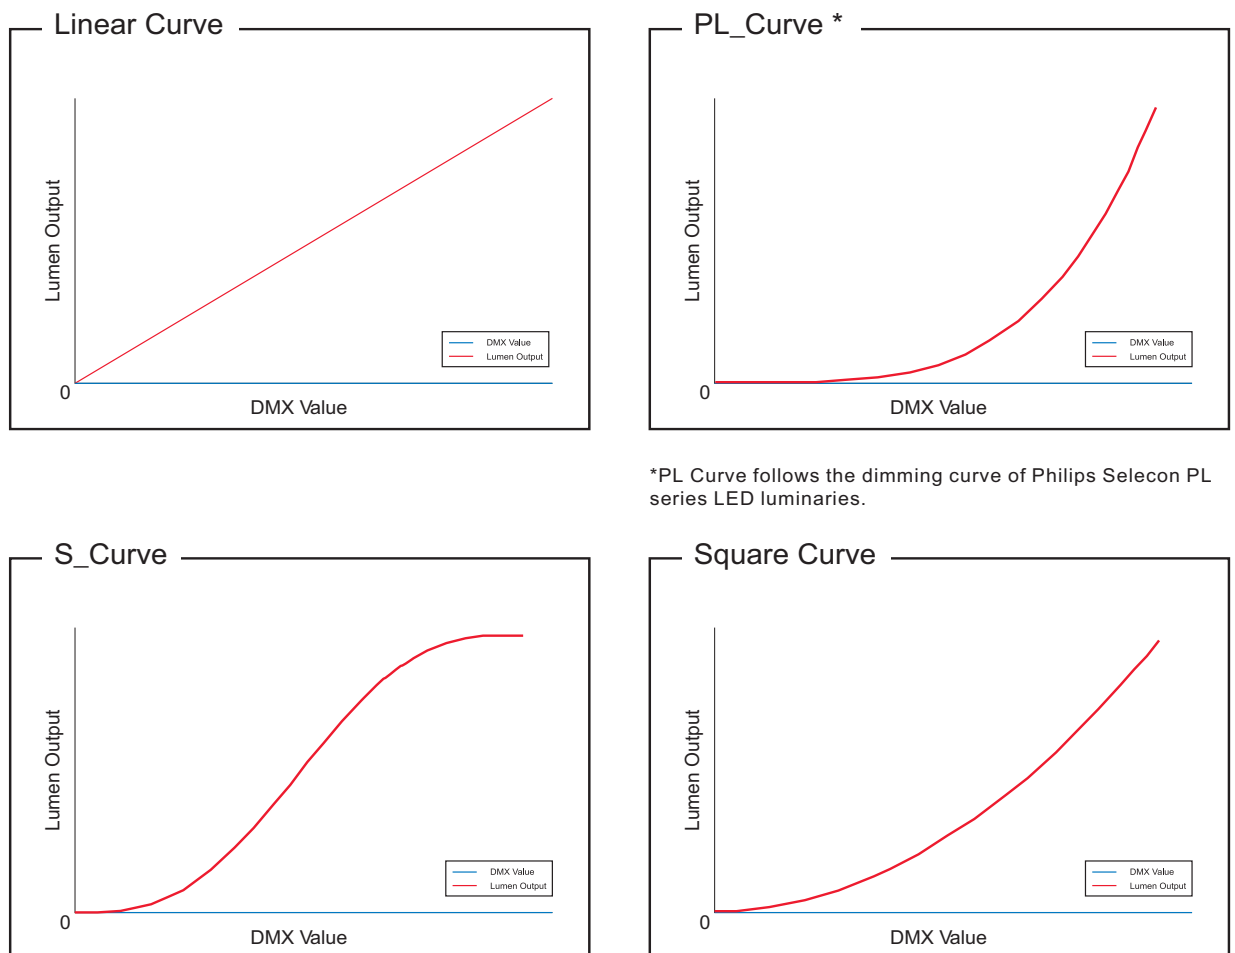

Figure 9: SL BEAM 100 LED Luminaire Dimmer Curves

5. Master / Slave Operational Mode

The Master / Slave Operational Mode allows one SL BEAM 100 LED Luminaire to act as the "Master" unit and all other connected units are controlled by this unit. When a unit is set to "Slave" mode, it will only listen to and follow any commands sent from a "Master" unit. Only one "Master" unit is allowed in this type of operation.

To setup a master / slave network:

- Step 1. Set the first device in the DMX512 chain to **Master Mode** through the unit's menu system.
- Step 2. Set all other connected units to **Slave Mode**.
- Step 3. The master unit can be controlled via DMX512, RDM or through standalone operation (self-contained network utilizing on-board effects). The slave units will mimic the master unit's operation in all cases.

Note: For more information on DMX512 networking and systems, refer to ["Additional Resources for DMX512" on page 1](#). For SL BEAM 100 LED Luminaire DMX Mapping, refer to ["DMX CONTROL" on page 14](#).

Figure 10: SL BEAM 100 LED Luminaire - Master / Slave Configuration

DMX CONTROL

This section contains information for operating the luminaire using DMX control in Simple 8-bit, RGBW 8-bit, RGBW 16-bit, and HSIC modes. For Menu options and detailed information, see "[LCD Display and Menu System](#)" on page 9.

Note: These tables assume a DMX start address of 1. When a different starting address is used, this address becomes channel 1 function and other functions follow in sequence.

1. Simple 8-bit Mode

Table 2 provides DMX channel mapping of all DMX512 control values when the SL BEAM 100 LED Luminaire is in Simple 8-bit mode (as set by the luminaire's menu system).

Table 2: SL BEAM 100 LED Luminaire DMX Channel Mapping (Simple 8-bit Mode)

DMX	Parameter	Range DMX	Range %	Defaults	Description
1	Pan - High Byte	0 - 255	0 - 100%	128	8-bit control of Pan
2	Tilt - High Byte	0 - 255	0 - 100%	128	8-bit control of Tilt
3	Master Intensity	0 - 255	0 - 100%	0	8 bit control for Intensity of LED settings.
4	Strobe	0 - 255	0 - 100%	0	Controls strobe operations as follows . . . Open = DMX 0 - 2 Closed = DMX 3 - 5 Slow Rand = DMX 6 - 7 Med Rand = DMX 8 - 10 Fast Rand = DMX 11 - 12 Strobe Range = DMX 13 - 127 (fastest) Pulse + Slow Rand = DMX 128 - 129 Pulse + Med Rand = DMX 130 - 131 Pulse + Fast Rand = DMX 132 - 133 Pulse + Range = DMX 134 - 191 Pulse - Slow Rand = DMX 192 - 193 Pulse - Med Rand = DMX 194 - 195 Pulse - Fast Rand = DMX 196 - 197 Pulse - Range = DMX 198 - 255
5	Zoom	0 - 255	0 - 100%	0	Variable control of zoom from 12 ⁰ - 45 ⁰
6	Control	0 - 255	0 - 100%	0	Functions of the SL Series products. Set control channel value to desired action, Hold value for at least 5 seconds, then turn to 0. Set control channel value to 0 without any scaling. Default Setting on Console = DMX 0-4 DIM Response_Normal = DMX 5 - 9 DIM Response_Incandescent = DMX 10 - 14 Dimming Curve_linear = DMX 30 - 34 Dimming Curve_Square = DMX 35- 39 Dimming Curve_S-Curve = DMX 40 - 44 Dimming Curve_PL-Curve = DMX 45 - 49 Calibration_OFF = DMX 70 - 74 Calibration_ON = DMX 75 - 79 Fan_Auto = DMX 80 - 84 Fan_Off = DMX 85 - 89 Reserves(Future use) = DMX 90 - 250
7	Red1-3	0 - 255	0 - 100%	0	8 bit control of Red LEDs from 0 to full.
8	Green1-3	0 - 255	0 - 100%	0	8 bit control of Green LEDs from 0 to full.
9	Blue1-3	0 - 255	0 - 100%	0	8 bit control of Blue LEDs from 0 to full.
10	White1-3	0 - 255	0 - 100%	0	8 bit control of White LEDs from 0 to full.

2. Simple 8-bit Group Mode

Table 3 provides DMX channel mapping of all DMX512 control values when the SL BEAM 100 LED Luminaire is in Simple 8-bit Group mode (as set by the luminaire's menu system).

Table 3: SL BEAM 100 LED Luminaire DMX Channel Mapping (Simple 8-bit Group Mode)

Simple 8 BIT MODE

9. SL BEAM100 LED Luminaire DMX Timing Channel Detail

Timing channel control improves the timed moves of certain groups of parameters. The SL BEAM 100 LED Luminaire provides timing channels in 16-bit mode (one for intensity time and one for color time) and one timing channel in 8-bit (color and intensity timing combined). The luminaire uses its timing channel value to calculate a smooth continuous operation for a given time and transition.

Guidelines:

- Timing channels support time values from zero to 60 minutes.
- To use a timing channel instead of console timing, it is recommended to set the timing channel to the desired value and set cue and/or console cue fade time to zero. A combination of time controls can produce unexpected results.
- The default value setting in the profile should be 255 (proportional control) to allow smooth operation when using console timing.
- The timing channel data should change as a snap. A zero value will give the fastest operation, however, without any smoothing this can appear "steppy" in console timed moves.

Refer to "[SL BEAM 100 LED Luminaire DMX Timing Channel Detail](#)" for more information.

CLEANING AND CARE

WARNING! All cleaning should be performed with power completely removed from the luminaire. Never remove protective covers when luminaire is powered. Wear appropriate protective eye wear and gloves when cleaning the fixture. All service and maintenance, other than described herein, should be performed by a qualified technician or Authorized Service Center.

1. Special Cleaning and Care Instructions

Being a solid-state fixture, and unlike most fixtures, the SL BEAM 100 LED Luminaire requires very little routine maintenance by the user. This section covers portions of the luminaire that can be removed for cleaning.

The SL BEAM 100 LED Luminaire special care when it comes to cleaning front lens assembly. Additional care needs to be taken with the plastic components because they are much easier to scratch or damage than glass.

The following is a list of cleaning materials required to care for your SL BEAM 100 LED Luminaire:

- Lint free lens tissue
- Lint or powder free gloves
- Reagent grade isopropyl alcohol*
- A mild soap solution.

Note: *Reagent grade isopropyl alcohol is good to use on the SL BEAM 100 LED Luminaire plastic optics with anti-reflection coatings.

If the lens is still dirty after using isopropyl alcohol, for instance if fingerprints or oil is just redistributed and not cleaned off the optic, then a mild soap and water solution can be used to gently wash the lens. Repeat the cleaning with isopropyl alcohol to eliminate streaks and soap residue.

WARNING! Under no circumstances should ammonia-based cleaners, acetone, or other harsh solvents be used on or near the SL BEAM 100 LED Luminaire. These types of cleaners or solvents can permanently damage the optics or housings of the fixture.

If you have any questions regarding the use or care of your SL BEAM 100 LED Luminaire, please contact Showline technical support or your local Authorized Dealer.

2. Front Lens Cleaning

To clean the front lens:

- Step 1. Disconnect luminaire from power and allow to cool completely.
- Step 2. Apply a small amount of reagent grade isopropyl alcohol to lint-free lens tissue.
- Step 3. Wipe all debris, dirt, fingerprints, etc. from lens.
- Step 4. Using a second lint-free lens tissue, wipe off any alcohol residue.

3. Service and Maintenance

For all other service and maintenance issues, please contact your local Showline office or an Authorized Service Center.

WARNING! Disassembly (other than as described herein), alterations, unauthorized service, etc. will void the product warranty. Contact your local Showline office or an Authorized Service Center for technical support and service.

TECHNICAL SPECIFICATIONS

1. SL BEAM 100 LED Luminaire Operational Specifications

Source:	CW LED Array
Beam Angle:	6-45 Degrees
Light Output:	> 1,500 lumens
Color Temperature:	2700 - 6500K (user adjustable)
Input Voltage (AC):	100V to 240V (+/- 10%, auto-ranging)
Current (AC):	1.5 Amps (100V) / 0.62 Amps (240V)
Frequency:	50/60Hz
Control Protocols:	DMX512 (1990) / DMX512A (RDM) / On-Board Menu
Ambient Temperature:	-20 to 40 Degrees C (-4 to 104 Degrees F)
Humidity:	5%-95% Non condensing
Cooling:	Forced Air Cooling
Weight:	16.72 lbs (7.6 kg) - Luminaire only (no accessories)
Housing:	Die Cast Aluminium with Powder Coating
Compliance:	CE Marked (International models)
IP Rating:	Ip20

Note: Common model specifications shown. For specific model specifications, features, and accessories, refer to the product specification sheet for more details.
