

# Philips Dynalite System Builder

Fast and efficient lighting control system set-up

Designed with the system installer and integrator in mind, System Builder is a comprehensive platform from Philips Dynalite. This user-friendly and intuitive application sets a new benchmark for efficient lighting control system set-up.

# Philips Dynalite System Builder

## Fast and efficient lighting control system set-up

- **New and improved set-up templates** – Provides a simple and intuitive interface for access to advanced system functionality, allowing flexibility to modify, customize or create specific tasks if required.
- **Faster commissioning times – Includes a series of common device settings based** on typical lighting control scenarios. Tailor to your project, save and replicate across other sites as required.
- **Virtual panel** – Control any area of the system directly, run sequences and test final operations.
- **Complex functionality made simple** – Manage logical grouping of lamps and other system hardware elements using simple graphical representations.
- **Maintenance made easy** – Print out project floor plans with fixture details, including DALI addresses, to facilitate maintenance planning.
- **Live data details** – The status of each lamp is visually represented using icons, which change color to reflect current lighting levels.
- **Monitor the whole system** – Inbuilt network monitor details and logs all Philips Dynalite network traffic, as well as DALI network traffic.
