

Introduction

Thank you for your purchase of the PEGASUS USB Upload Cable. The PEGASUS Software and luminaire firmware files are available for download from one of our web sites as described “Computer Requirements”. You can connect any USB 2.0 compatible port on a computer to a chain of up to 32 Philips Entertainment luminaires in order to update the luminaire software.

Included Items

Computer Requirements

- PC running Windows. Although the programming kit software is not directly compatible with Macintosh computers, it does run with some Windows emulators.
- An available USB 2.0 compatible port on your computer.
- Internet access to one of web sites (as described below) to download the PEGASUS Software and PEGASUS Software User’s Guide. Regardless from which web site you download the software, the software will contain the ability to update or reinstall luminaire software for all brands.
 - For Selecon luminaires: www.seleconlight.com.
 - For Showline luminaires: www.philips.com/showline.
 - For Strand Lighting products: www.strandlighting.com.
 - For VARI*LITE luminaires: www.vari-lite.com.

Note: Internet access is only required to download the PEGASUS Software and product firmware files. Internet access is not required to use the program.
