# IMPORTANT INFORMATION

## Warnings and Notices

When using electrical equipment, basic safety precautions should always be followed including the following:

- a. **READ AND FOLLOW ALL SAFETY INSTRUCTIONS.**
- b. Do not use outdoors.
- c. Do not mount near gas or electric heaters.
- d. Equipment should be mounted in locations and at heights where it will not readily be subjected to tampering by unauthorized personnel.
- e. The use of accessory equipment not recommended by the manufacturer may cause an unsafe condition.
- f. Do not use this equipment for other than intended use.
- g. Refer service to qualified personnel.

**SAVE THESE INSTRUCTIONS.**

**WARNING:** You must have access to a main circuit breaker or other power disconnect device before installing any wiring. Be sure that power is disconnected by removing fuses or turning the main circuit breaker off before installation. Installing the device with power on may expose you to dangerous voltages and damage the device. A qualified electrician must perform this installation.

**WARNING:** Refer to National Electrical Code® and local codes for cable specifications. Failure to use proper cable can result in damage to equipment or danger to personnel.

**WARNING:** This equipment is intended for installation in accordance with the National Electric Code® and local regulations. It is also intended for installation in indoor applications only. Before any electrical work is performed, disconnect power at the circuit breaker or remove the fuse to avoid shock or damage to the control. It is recommended that a qualified electrician perform this installation.

## Additional Resources for DMX512

For more information on installing DMX512 control systems, the following publication is available for purchase from the United States Institute for Theatre Technology (USITT), "Recommended Practice for DMX512: A Guide for Users and Installers, 2nd edition" (ISBN: 9780955703522). USITT Contact Information:

# PREFACE

## 1. About this Manual

The document provides installation and operation instructions for the following products:

- SL BAR 520 RGBW LED Luminaire

Please read all instructions before installing or using this product. *Retain this manual for future reference.* Additional product information and descriptions may be found on the product specification sheet.

**Note:** The SL BAR 520 RGBW LED Luminaire is universal voltage 100 to 240 VAC (auto-ranging).

## 2. Included Items

Each SL BAR 520 RGBW LED Luminaire includes the following items:

Figure 1: Included Items

## 3. Accessories

### SL BAR 520 RGBW LED Luminaire Power Input Cables (North American Models Only)

Part Number	Description
PC1BE	SL BAR 520 RGBW LED Luminaire AC Power Input Cable (39 inches / 1 meter), Powercon with Bare End* (*Note, user supplies and installs own AC input connector)
PC1GP	SL BAR 520 RGBW LED Luminaire AC Power Input Cable (39 inches / 1 meter), Powercon with Stagepin Connector
PC1GTL	SL BAR 520 RGBW LED Luminaire AC Power Input Cable (39 inches / 1 meter), Powercon with Twistlock Connector
PC1GR	SL BAR 520 RGBW LED Luminaire AC Power Input Cable (39 inches / 1 meter), Powercon with Edison Connector
PC3BE	SL BAR 520 RGBW LED Luminaire AC Power Input Cable (9.8 Feet / 3 meter), Powercon with Bare End* (*Note, user supplies and installs own AC input connector)
PC8BE	SL BAR 520 RGBW LED Luminaire AC Power Input Cable (26 Feet / 8 meter), Powercon with Bare End* (*Note, user supplies and installs own AC input connector)
PC8GR	SL BAR 520 RGBW LED Luminaire AC Power Input Cable (26 Feet / 8 meter), Powercon with Edison Connector

### SL BAR 520 RGBW LED Luminaire Accessories

Part Number	Description
SLBAR520YP	Yoke Plate, Black
MC	Mega Claw, Black, Anodized
SC	Molded Yoke C-Clamp
HC	Light Weight Half Coupler
82003	Safety Cable
SLPIN1	Luminaire Connecting Pin (North American Models Only)

# SL BAR 520 RGBW LED LUMINAIRE OVERVIEW

## 1. SL BAR 520 RGBW LED Luminaire Components

### Major Luminaire Components

Figure 2: SL BAR 520 RGBW LED Luminaire Components

**Note:** \*Mounts can be removed and reversed. See "[Mounting Luminaire](#)" on page 10 for more information

### LCD Display / Menu System

**NOTE:** Menu rotates with orientation of luminaire and menu buttons are always in the same position (with rotation of menu)

*To rotate menu 180 degrees from current orientation, press and hold the two center buttons for 2 seconds.*

**Figure 3: LCD Display & Menu System**

**Note:** For Menu operation and programming details, refer to "LCD Display and Menu System" on page 16.

# INSTALLATION AND SET UP

## 1. Power Requirements

The SL BAR 520 RGBW LED Luminaire operates on AC input voltages from 100 to 240 VAC.

**WARNING!** This unit does not contain an ON/OFF switch. Always disconnect power input cable to completely remove power from unit when not in use.

### AC Power Operation

When connected to an AC source, the unit operates on 100 to 240 volts AC (+/- 10%, auto-ranging). The luminaire contains an auto-ranging power supply. Each luminaire can draw up to 300 Watts.

**WARNING!** Maximum amount of units that may be daisy-chained is (A) 6 units at 100VAC (20 Amps) or (B) 16 units 230 ~ 240VAC (20 Amps). Refer to [Table 1](#) for detailed information at various voltages.

**Note:** For wiring of AC input connector, refer to "[Connecting SL BAR 520 RGBW LED Luminaires to AC Power](#)" on page 8.

**Table 1: SL BAR 520 RGBW LED Luminaire Voltage vs. Current**

Voltage (AC)	Total Current (A)	Maximum number of units that can be linked together*	Voltage (AC)	Total Current (A)	Maximum number of units that can be linked together*
100	3.00	6	180	1.67	11
110	2.72	7	190	1.58	12
120	2.50	8	200	1.50	13
130	2.31	8	210	1.43	13
140	2.14	9	220	1.36	14
150	2.00	10	230	1.30	15
160	1.88	10	240	1.25	16
170	1.76	11			

**WARNING!** \*These figures are based on the Maximum Allowable Input Current of 20 Amps (and the maximum power supply limit of 300 Watts). **Do not overload circuits!**

#### IMPORTANT AC POWER CONNECTION NOTES:

- When using the daisy-chain connection method, **ONLY** connect SL BAR 520 RGBW LED Luminaires to AC Output Connection of SL BAR 520 RGBW LED Luminaires. **DO NOT CONNECT OTHER TYPES OF LUMINAIRES OR DEVICES!**
- Use only use approved cable types.
- Do not overload circuits!
- Do not connect SL BAR 520 RGBW LED Luminaires to dimmed circuits.
- The **MAXIMUM** allowable number of SL BAR 520 RGBW LED Luminaires which can be 'daisy-chained' on one power feed are listed in [Table 1](#), above. **DO NOT EXCEED!**

## 2. Connecting Power

Units can be powered in one of two ways:

- Direct connection to a AC power source using an AC input cable. For wiring of AC input connector, refer to "Connecting SL BAR 520 RGBW LED Luminaires to AC Power" below.
- Connection from the AC output of another SL BAR 520 RGBW LED Luminaire. When using this method, it is very important not to connect any other type of equipment device.

**WARNING!** Only connect other SL BAR 520 RGBW LED Luminaires to the AC Output (Thru) connector of a SL BAR 520 RGBW LED Luminaire.

### Connecting SL BAR 520 RGBW LED Luminaires to AC Power

If the unit is supplied with an AC input cable without an input connector installed. The input connector is a user-supplied accessory.

Table 2 on page 8 describes how to connect power to your SL BAR 520 RGBW LED Luminaire. Field wiring of the SL BAR 520 RGBW LED Luminaire is straight forward. The following wiring scheme is used:

**Table 2:** SL BAR 520 RGBW LED Luminaire (IP20 Rated Models) AC Input Connections

Wire Color	Purpose
Brown	Main / Line (100 to 240VAC)
Blue	Neutral
Green/Yellow	Ground (Earth)

**Figure 4:** SL BAR 520 RGBW LED Luminaire AC Input & Output Connections

**CAUTION:** In the event the AC input cable of this luminaire is damaged, it must be replaced, by the user, with an approved cable through an Authorized Showline Dealer or Service Center.

### 3. Connecting to the DMX512 Network

Basic DMX512 installation consists of connecting multiple SL BAR 520 RGBW LED Luminaires together (up to 32 luminaires) in "daisy-chain" fashion. A cable runs from the control console (or DMX512 control source) to the DMX connector on the first SL BAR 520 RGBW LED Luminaire. Another cable runs from the other DMX connector on the first unit to a DMX connector on the next SL BAR 520 RGBW LED Luminaire (or DMX512 device to be controlled).

**Figure 5: SL BAR 520 RGBW LED Luminaire DMX512 Input / Output Connections**

**Note:** For more information on DMX512 networking and systems, refer to "[Additional Resources for DMX512](#)" on page 1. For SL BAR 520 RGBW LED Luminaire DMX Mapping, refer to "[DMX CONTROL](#)" on page 27.

DMX512 Connections	
DMX512 Signal	XLR Pin
Common (Drain)	1
DMX512 -	2
DMX512 +	3

Note: Remaining pins on each connector are not used.

**Figure 6: SL BAR 520 RGBW LED Luminaire - DMX512 Connections**

## 4. Mounting Luminaire

The SL BAR 520 RGBW LED Luminaire is provided with two mounts and safety cable anchor points.

The two mounts are easily removed and reversed as required. These mounts are designed to accept a variety of mounting hooks, clamps, etc. for hanging applications or can be set on the mounts for floor applications. Refer to **Figure 7** for additional information. *Note, the bottom of the luminaire must be free and clear of any objects (i.e., scenery) to allow for proper airflow.*

Simply attach hook, clamp, etc. to the SL BAR 520 RGBW LED Luminaire mount assembly in the M13 hole.

**Note:** Mounting hooks, clamps, etc. are sold separately or by others. For available mounting accessories refer to "Accessories" on page 4.

Figure 7: Mounting Luminaire - Hanging Applications

## 5. Connecting & Mounting Multiple Luminaires

SL BAR 520 RGBW LED Luminaires include a built-in Quick Connect system that allows the luminaires to be physically connected together while retaining perfect pixel pitch. Units may be connected in top-to-bottom or side-by-side to allow for a wide range of configurations. In addition, they may be connected together with the SL NITRO 510 LED STROBE luminaire.

### Connecting Luminaires Top-to-Bottom

Each SL BAR 520 RGBW LED Luminaire includes two built-in Quick Connect slot and pin systems as illustrated in **Figure 8**. This allows a quick connection of units when stacked on top of each other. Up to ten SL BAR 520 RGBW LED Luminaires may be supported when connected using the Quick Connect system.

**Figure 8: Connecting Luminaires Top-to-Bottom**

**WARNING!** Your structure must be capable of properly supporting the weight of multiple connected fixtures. Each fixture must use an approved safety cable attached to a fixed object. Up to ten SL BAR 520 RGBW LED Luminaires may be supported when connected using the Quick Connect system. When connecting units together, ensure all Quick-Connect pins are in the "engaged" position.

### Connecting Luminaires Side-to-Side

Each SL BAR 520 RGBW LED Luminaire ships with three Luminaire Connecting Pins as indicated in **Figure 9**. All three pins are used to connect two luminaires together linearly. Each fixture must be mounted using its own mounting hardware. The side-to-side pins are only to align the luminaires and do not provide hanging support.

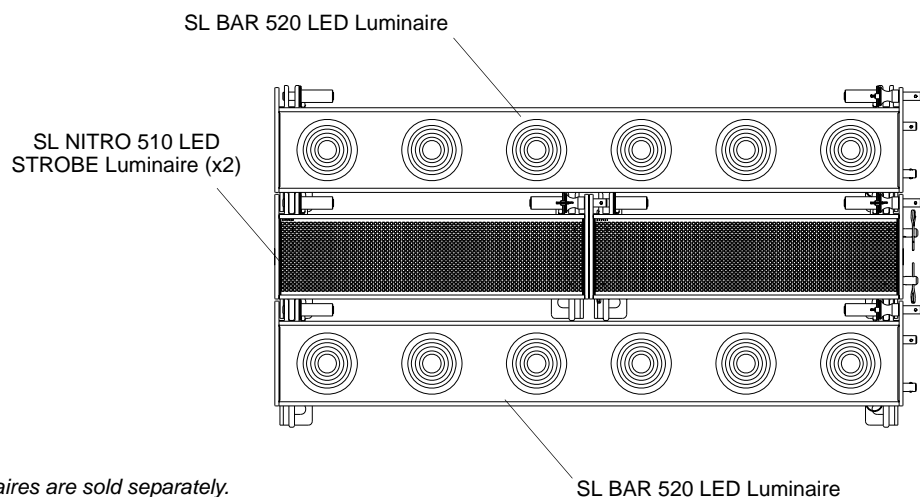

**Figure 9: Connecting Luminaires Side-to-Side**

**WARNING!** Each fixture must use an approved safety cable attached to a fixed object.

## 6. Mounting SL BAR 520 RGBW LED Luminaire with Other Luminaires

The SL BAR 520 RGBW LED Luminaire and SL NITRO 510 LED STROBE Luminaire are designed to be connected together top-to-bottom and/or end-to-end using the same connecting hardware. The pixels of the SL NITRO 510 LED STROBE Luminaire and the zones of the SL BAR 520 RGBW LED Luminaire will be perfectly aligned when connected via the built-in connecting hardware.

**Figure 10: Combining SL BAR 520 and SL NITRO 510 luminaires**

### Connecting Combined Luminaires Top-to-Bottom

When combining units connected top-to-bottom, two SL BAR 520 RGBW LED Luminaires are first connected end-to-end and then connected top-to-bottom with a single SL BAR 520 luminaire.

#### Connecting Notes:

**WARNING!** Do not exceed ten rows of combined luminaires connected together top-to-bottom with a single hanging point. If more than ten rows are required, each ten rows must use its own connection to a fixed object.

- The two SL NITRO 510 units must have all three side-to-side pins installed (refer to **Figure 11** and "[Connecting Luminaires Side-to-Side](#)" on page 12).

**Figure 11: SL BAR 520 RGBW LED Luminaires - Connections**

- When two SL NITRO 510 LED STROBE Luminaires are combined with a SL BAR 520, there is no top-to-bottom connection available in the center.
- When a SL BAR 520 unit is mounted below the two SL NITRO 510 LED STROBE Luminaires, the top-to-bottom connections will rest on the center of the SL BAR 520, preventing the units from spreading apart in the center.
- If the bottom of a configuration has two SL NITRO 510 LED STROBE Luminaires below a single SL BAR 520, connect the bottom center top-to-bottom connections with the following hardware (available from others) to pre-

vent the spacing between the two SL NITRO 510 LED STROBE Luminaires from spreading apart at the center. Obtain and install:

- 1) One M10-1.5 x 25 mm Long, Hex Head Cap Bolt
  - 2) One 10 mm Flat Washer
  - 3) One 10 mm Split-Lock Washer
  - 4) One M10-1.5 (8 mm high) Hex Nut
- Installation is Flat Washer under Bolt Head, Bolt through both SL BAR 520 RGBW LED Luminaire brackets, Lock Washer, and then Hex Nut. Hand tighten.

**WARNING!** Your structure must be capable of properly supporting the weight of multiple connected fixtures. Each fixture must use an approved safety cable attached to a fixed object. Up to ten luminaire rows may be supported when connected using the Quick Connect system.

## Connecting Combined Luminaires Side-to-Side

When combining units connected side-to-side, all units connect using the same pin system and any combination can be created (refer to installation instructions and warnings contained in "Connecting Luminaires Side-to-Side" on page 12).

- Each SL NITRO 510 LED STROBE Luminaire and SL BAR 520 RGBW Luminaire ships with three Luminaire Connecting Pins as indicated in **Figure 9**.
- The three side-to-side pins must be installed per luminaire.
- All three pins are used to connect luminaires together linearly. Each fixture must be mounted using its own mounting hardware. The side-to-side pins are only to align the luminaires and do not provide hanging support.
- **Figure 12** shows an example of connecting luminaires side-by-side.

**Figure 12: Connecting Combined Luminaires Side-to-Side Example**

**WARNING!** Each fixture must use an approved safety cable attached to a fixed object.

# OPERATION AND PROGRAMMING

---

## 1. LCD Display and Menu System

The SL BAR 520 RGBW LED Luminaire's LCD Display and Menu System provides local control for accessing the following fixture's settings:

- Presets (Standard and User Defined)
- Color Filters
- Effects (Chases - preloaded and user defined)
- Strobe / Timing
- Fixture Settings
- Fixture Lockout (to prevent changes)
- Password Setting
- Current Fixture Operational Status
- Setting the DMX512 Address

---

**Note:** If there are multiple luminaires in a system, changes would need to be made at each LCD Menu as desired. For SL BAR 520 RGBW LED Luminaire menu structure, see "[SL BAR 520 RGBW LED Luminaire Main Menu Options](#)" on page 17.

---

Upon power up, the LCD will display the main screen showing the product type/name. If DMX is enabled, the programmed address will appear after power up.

## 2. LCD Display and Menu System Operation

The LCD Display Menu system consists of several categories. Use the Menu Buttons to access and make changes to the menu items. When the desired menu item is reached, press the desired Menu Button to display the menu options and to navigate and configure the menu options as required.

**To navigate and access menu settings/selections:**

- Step 1. Make sure unit is powered and turned on.
- Step 2. Press the desired button (as shown in **Figure 13 on page 17**) to access menu categories.
- Step 3. Use UP | DOWN | LEFT | RIGHT arrow buttons to navigate through the various options and settings.
- Step 4. Make changes as desired.
- Step 5. Press CHECK MARK (OK) button to accept changes.

Figure 13: LCD Display and Menu System

### 3. SL BAR 520 RGBW LED Luminaire Main Menu Options

#### Presets

Presets are stored values of the luminaire's LED settings that can be recalled via the menu system or DMX. You can customize up to 31 presets via the menu system.

#### Recalling or Editing Presets

##### To recall or edit a preset:

- Step 1. Select Preset from the main menu or from the Preset shortcut key.
- Step 2. The top left field indicates the current preset or Off, when this field is selected (highlighted in blue), use the left and right buttons to scroll through all presets
- Step 3. If you wish to edit the preset, use the Up and Down keys to scroll through the parameters. Once a parameter is selected, use the left and right arrow buttons to make adjustments.

#### Notes:

- If security features are enabled, the Up and Down arrows will have no effect. See "Settings/Security" on page 20.
- Depending on the DMX map set assigned the DMX menu, different either RGBW or HSIC parameters will be available.

- Step 4. Once all values are adjusted as desired, press the Check Mark button to save the preset.
- Step 5. The Save Preset Menu option will appear. Use the left and right arrow buttons to select the preset number to save to.

**Note:** This function allows you to save your current edits to a different preset number than you began editing. This is helpful to create copies of existing presets.

- Step 6. Press the Check Mark button to save the preset. You will be asked to confirm your saving operation.
- Step 7. The preset is now saved and can be recalled via the menu or DMX.

### Color Filter

Color filters are 43 factory made colors that utilize the Harmonize Color Calibration system (refer to "[Harmonize Color Calibration](#)" on page 24 for more information). They can be recalled via the menu system or DMX.

#### To recall a color filter from the menu:

- Step 1. Select Color Filter from the main menu
- Step 2. The top indicates the current color filter or Off, when this field is selected (highlighted in blue), use the left and right buttons to scroll through all color filters.
- Step 3. Use the Up and Down arrow keys to toggle to the Master Intensity field. Use the Left and Right arrow keys to adjust the Master Intensity.
- Step 4. The menu will display a graphical indication of the color along with the color name.

---

**Note:** The color filter will remain ON until you select a preset, chase, other color filter or send the unit DMX.

---

### Effects

Effects are chases stored values of the luminaire's LED settings that can be recalled via the menu system or DMX. There are 10 factory defined chases and eight user adjustable chases. You can adjust the master intensity, speed, and fade values for any of the 18 chases.

Use the Up and Down buttons to select parameters and the Left and Right buttons to assign the different general fixture settings. When finished, press the Check button to exit the menu level. The adjustable parameters are described in Table 3.

**Table 3: Effects Parameters**

Parameter	Description
User Chase / Built-in Chase	Select from the 18 different chases.
Master Intensity	Adjust the master intensity for ALL chases.
Total Steps	Displays the total steps used by the chase. This field is not editable.
Speed	The total time each step of the chase will be recalled.
Fade	The percentage of the time assigned by the speed that is crossfaded between steps.

### Editing User Chases

Eight User chases can be further customized to create different effects on the fixture. To edit a User Chase, first use the up and down arrows to scroll to the Edit User Chase field and then press the Check Mark button. The Edit User Chase window will be displayed:

Use the Up and Down buttons to select parameters and the Left and Right buttons to assign the different general fixture settings. When finished, press the Check button to exit the menu level. The adjustable parameters are described in Table 4.

**Table 4: Chase Parameters**

Parameter	Description
User Chase	Select which chase you wish to edit.
Total Steps	Displays the total steps used by the chase. This field is not editable.
Edit Step	Select a step to edit with the left right arrow buttons. Press the Check Mark button to edit the step. (see <a href="#">To edit and save a Step:</a> )
New Step	Add a step to the end of the chase. Press the Check Mark button to edit the new step. (see <a href="#">To edit and save a Step:</a> )
Delete Step	Delete the currently selected step in the Edit Step field. Press the Check Mark button to delete the current step.
Rainbow	Press the Check Mark button to display the Rainbow Chase editor.

**To edit and save a Step:**

- Step 1. Select Edit Step or New Step from the Edit User Chase menu.
- Step 2. The top left field indicates the preset or color filter to be used for the step. When set to OFF no preset or color filter is to be used. Use the left and right buttons to scroll through all presets and color filters.
- Step 3. Use the Up and Down keys to scroll through the output parameters. Once a parameter is selected, use the left and right arrow buttons to make adjustments.

**Notes:**

- If security features are enabled, the Up and Down arrows will have no effect. See "[Settings/Security](#)" on page 20.
  - Fixtures with multiple pixel control include a parameter titled "Pixel" that allows you to independently adjust the output of each individual pixel or the entire fixture.
  - Depending on the DMX map set assigned the DMX menu, different either RGBW or HSIC parameters will be available.
- Step 4. Once all values are adjusted as desired, press the Check Mark button to return to the Edit User Chase screen.
- Step 5. Continue editing steps as needed. When complete, press the Return to Main Menu button or up one level (*as shown to the right*). to exit the Edit User Chase window.
- Step 6. The user chase is now saved and can be recalled via the menu or DMX.

**Edit Rainbow**

An additional option in the Edit User Chase options is to have the fixture generate a multi-colored chase using different pixels from the fixture. When you select Rainbow from the Edit Step window the Edit Rainbow window will display the following options.

**Table 5: Rainbow Parameters**

Parameter	Description
Direction	Select either right or left to define the direction the rainbow effect runs.
Number of Color	Select the number of colors used in the rainbow effect.
Current Color	Will display the values of the current color selected. Press the Check Mark button to edit the selected color.
Delete Step	Delete the currently selected step in the Edit Step field. Press the Check Mark button to delete the current step.

Use the Up and Down buttons to select parameters and the Left and Right buttons to assign the settings. When finished, press the Check button to exit the menu level.

The bottom of the Edit Rainbow window displays a graphical representation of the current rainbow effect.

When finished editing the Rainbow, press the Main Menu button (*as shown to the right*). You will be asked to confirm that you wish to save the rainbow. Select Yes to save and return to the Edit a Chase window.

**Strobe/Timing**

The Strobe/Timing menu allows you to assign strobe and timing values from the menu system. These settings are instantly applied to any active Preset, Color filter, or chase.

Use the Up and Down buttons to select parameters and the Left and Right buttons to adjust the currently selected parameter. The adjustable parameters are described in [Table 6 on page 20](#).

**Table 6: Strobe / Timing Parameters**

Parameter	Description
Master Intensity	Overall fixture output intensity level.
Strobe: X	Strobe mode and rate value settings following DMX map (see <a href="#">DMX CONTROL</a> for details).
Duration	The time each strobe flash remains ON.
Intensity Timing	The time used to change intensity values when running a chase.
Color Timing	The time used to change color values when running a chase.

**Settings/Security**

All Showline fixtures have a multiple level locking feature. This allows you to configure the fixture and allow different menu access to multiple users. The menu system can be locked instantly or assigned to power on to a particular lock level. You can assign three different 4-digit PIN (personal identification number) codes to each unlock specific levels of functionality within the menu system.

Anytime the fixture is locked, each PIN code will unlock all functions except the pertaining features assigned via the security level.

---

**Note:** The Level 3 PIN will always unlock all functions.

---

**Table 7: Security Lock Levels**

Lock Level	Menu Functions Affected
Level 1	Edit Presets, Edit Chases, and Settings Menu
Level 2	Settings Menu
Level 3	All

Use the Up and Down buttons to select security PIN codes. Press the Check button and then use Left and Right and Up Down buttons to assign the pin code. Press the Check button to save the new PIN code.

The Power-Up Level parameter assigns a lock level to the fixture when power is applied. Use the Up and Down buttons to select the Power-Up Level, and then use the Left and Right buttons to select the Power-up Level option.

**Table 8: PIN Level Parameters**

Parameter	Description
Enter Pass PIN	Enter a PIN code matching the level codes assigned in the Settings/Security menu to toggle the current security level.
Level 1 PIN	Edit the PIN code used to toggle the Level 1 security.
Level 2 PIN	Edit the PIN code used to toggle the Level 2 security.
Level 3 PIN	Edit the PIN code used to toggle the Level 3 security.
Power-up Level	Select the security level to default to when the fixture is powered ON. <ul style="list-style-type: none"> <li>• Disable PIN will disable all security functions.</li> <li>• Locked will lock all functions.</li> </ul>

### Settings/General

Use the Up and Down buttons to select parameters and the Left and Right buttons to assign the different general fixture settings. When finished, press the Check button to exit the menu level. The adjustable parameters are described in Table 9.

**Table 9: General Level Parameters**

Parameter	Description
Power-Up	Select the action of the fixture when the unit is powered ON. You can select from Off, Last Set, Color filters, presets, and chases.
Mode	Select either Master/Slave (see <a href="#">Master / Slave Operational Mode</a> for more information).
Dim Response	Select Normal, Incandescent, or Reduced dimming response. <ul style="list-style-type: none"> <li>• Normal: Fixture LEDs dim with a normal response.</li> <li>• Incandescent: Fixture LED's dim with an incandescent emulation response. The response to dimming commands will be slightly delayed at lower intensities.</li> <li>• Reduced: The response to dimming commands will be calculated with a smaller algorithm to provide emulation with other manufacturer's products.</li> </ul>
Dimming Curve	Select one of four dimming curve choices (see <a href="#">Dimming Curve Selection</a> for more information).
Calibration	Toggle Harmonize Color Calibration on or off (see <a href="#">Harmonize Color Calibration</a> for more information).
Fan Control	Select Auto or Off fan operation (see <a href="#">DMX CONTROL</a> for more information).

### Settings/Factory Default

Factory default menu settings can be recalled through this menu option. You can select if you wish to overwrite the user edited preset and chases.

Use the Up and Down buttons to select parameters and the Left and Right buttons to assign the different settings. When finished, press the Check button to exit the menu level. The adjustable parameters are described in Table 10.

**Table 10: Factory Default Parameters**

Parameter	Description
Protected	<ul style="list-style-type: none"> <li>• No - all menu items are able to be restored to factory defaults.</li> <li>• Preset &amp; Chase - user edited Presets and Chases are not able to be restored to factory defaults.</li> </ul>
Load Factory	<ul style="list-style-type: none"> <li>• No - no action.</li> <li>• Yes - restore to factory default menu settings.</li> </ul>

### Settings/DMX

DMX configuration options are available in the DMX menu.

Use the Up and Down buttons to select parameters and the Left and Right buttons to assign the fixture's DMX settings. When finished, press the Check button to exit the menu level. The adjustable parameters are described in Table 11.

**Table 11: DMX Setting Parameters**

Parameter	Description
DMX Enable	<ul style="list-style-type: none"> <li>• Enable - Fixture will respond to DMX commands/signals.</li> <li>• Disable - Fixture will ignore DMX commands/signals.</li> </ul>
Address	Assigns the fixture's DMX start address.
Map	Selects the DMX map for the fixture to use (see <a href="#">DMX CONTROL</a> section for more information).
When no DMX	Selects the action of the fixture when the unit is powered ON and not receiving DMX. <ul style="list-style-type: none"> <li>• Off - Turn off all LED output.</li> <li>• Last Action - restore the last menu action.</li> <li>• Power-up - follow the power-up value in the settings menu.</li> <li>• Hold - continue with the last DMX values received.</li> </ul>
LED Group	Select the number of LED groups to control via DMX (see <a href="#">DMX CONTROL</a> section for more information)

## Settings/DMX Control Channel

DMX configuration options are available in the DMX Control Channel menu.

Use the Up and Down buttons to select parameters and the Left and Right buttons to assign the fixture's DMX settings. When finished, press the Check button to exit the menu level. The adjustable parameters are described in Table 12.

**Table 12: DMX Setting Parameters**

Parameter	Description
Dim Response Normal	Fixture LEDs dim with a normal response.
Dim Response Incandescent	Fixture LED's dim with an incandescent emulation response. The response to dimming commands will be slightly delayed at lower intensities.
Dimming Curve Linear	Applies a linear control of the output of the fixture based on the DMX values on the Intensity Control Channels. See <a href="#">Dimming Curve Selection</a> for more details.
Dimming Curve Square	Applies a square law control of the output of the fixture based on the DMX values on the Intensity Control Channels. See <a href="#">Dimming Curve Selection</a> for more details.
Dimming Curve S-Curve	Applies an S-Curve control of the output of the fixture based on the DMX values on the Intensity Control Channels. See <a href="#">Dimming Curve Selection</a> for more details.
Dimming Curve PL-Curve	Applies a dimming curve that follows the Philips Selecon PL series LED Luminaires control of the output of the fixture based on the DMX values on the Intensity Control Channels. See <a href="#">Dimming Curve Selection</a> for more details.
Calibration OFF	Toggle Harmonize Color Calibration OFF (see <a href="#">Harmonize Color Calibration</a> for more information).
Calibration ON	Toggle Harmonize Color Calibration ON (see <a href="#">Harmonize Color Calibration</a> for more information).
Fan Auto	Fixture fans come on as needed and will still vary in speed, but will not exceed the factory set minimal noise limit.
Fan Off	Fixture fans will remain off in all circumstances and the fixture will automatically reduce LED output levels if LED temperatures rise above factory settings.

## Settings / LED Group

Select the number of LED groups to control via DMX (see the individual modes contained in "[DMX CONTROL](#)" on [page 27](#) for details).

## Settings/Display

Options of the fixture's LCD display can be adjusted in the Display menu.

Use the Up and Down buttons to select parameters and the Left and Right buttons to assign the fixture's DMX settings. When finished, press the Check button to exit the menu level. The adjustable parameters are described in Table 13.

**Table 13: LCD Display Parameters**

Parameter	Description
Flip Display	<ul style="list-style-type: none"> <li>• Yes - The display will be inverted.</li> <li>• No - The display will not be inverted.</li> <li>• Auto - The display will automatically invert depending upon fixture orientation.</li> </ul>
Off Time	Assign a time for the display to automatically turn off after the last button press. A value of ON will leave the display on indifferently.
Language Select	English is the only language currently supported.

## Lock Fixture

You can lock all fixture functions, requiring a PIN code to access the menu functions. When you select this menu item, you are asked to confirm that you wish to lock the fixture. Once locked, all menu items can only be accessed by entering one of the three PIN codes assigned in the Settings/Security menu. (see "[Settings/Security](#)" on [page 20](#) for more information). The PIN code used to unlock the fixture will only unlock the functionality assigned to that particular PIN code.

**Note:** When the fixture is powered off, the Lock Fixture function will be disabled. To assign fixture power-up security refer to (see "[Settings/Security](#)" on [page 20](#) for more information).

## Password (PassPIN)

The Password menu item will display an Enter PassPIN dialog box. Use the Up Down Left Right buttons to enter a PIN code matching the codes assigned in the Settings/Security menu to toggle the current security level.

## Status

The Status screen displays the current value of the master intensity and each LED of the luminaire. The number of pixels will vary depending upon fixture type. Use the Up Down Left Right arrows to scroll through the different LEDs and view their levels.

- The last Status item displayed shows the RDM UID and current Firmware Version.
- Press the Check Mark button to exit the Status screen.

## Quick Selection Buttons

The Showline menu system includes four quick selection buttons on the top of the menu. These keys provide direct access to common functions and act as shortcuts to main menu items as described in Table 13.

**Table 14: Quick Select Buttons**

Quick Select Button	Description
	Main Menu Refer to <a href="#">Settings/General</a> for more information.
	Edit a Preset Refer to <a href="#">Recalling or Editing Presets</a> for more information.
	Effects / Edit a Chase Refer to <a href="#">Effects</a> and <a href="#">Editing User Chases</a> for more information.
	DMX Start Address Refer to <a href="#">DMX Address</a> for more information.
	Return to Main Menu / Return Up a Menu Item

## DMX Address

You can display and edit the current DMX start address for the fixture by pressing the Quick Select button on the top of the menu system (as shown right). The current DMX start address will be display in large digits.

### To edit the DMX start address:

- Step 1. Press the Check Mark button to begin the DMX start address editing. The last digit will change to a blue color.
- Step 2. Use the UP and Down arrows to change the value of the currently selected digit.
- Step 3. Use the Left and Right arrows to select another digit to adjust.
- Step 4. Press the Check Mark button to save the new DMX Start Address.

## 4. Harmonize Color Calibration

Harmonize is a proprietary, advanced LED color matching system, consisting of 3 correction modules: RGB, RGBW and Cool White/Warm White. Every Showline fixture undergoes rigorous testing to provide you with consistent control of color and intensity as well as output of the highest quality.

When enabled either via DMX or the fixture's menu, the Harmonize technology will ensure that colors match from fixture-to-fixture and pixel-to-pixel. As the Harmonize system matches Showline products, they will all operate in the same color space. Use the Harmonize system when perfect color matching is an essential requirement.

---

**Note:** When attempting to achieve the most saturated colors possible, disable the Harmonize color calibration.

---

## 5. Dimming Curve Selection

Through the menu, you are able to select one of four dimming curves:

- Linear Curve
- PL\_Curve
- S\_Curve
- Square Curve

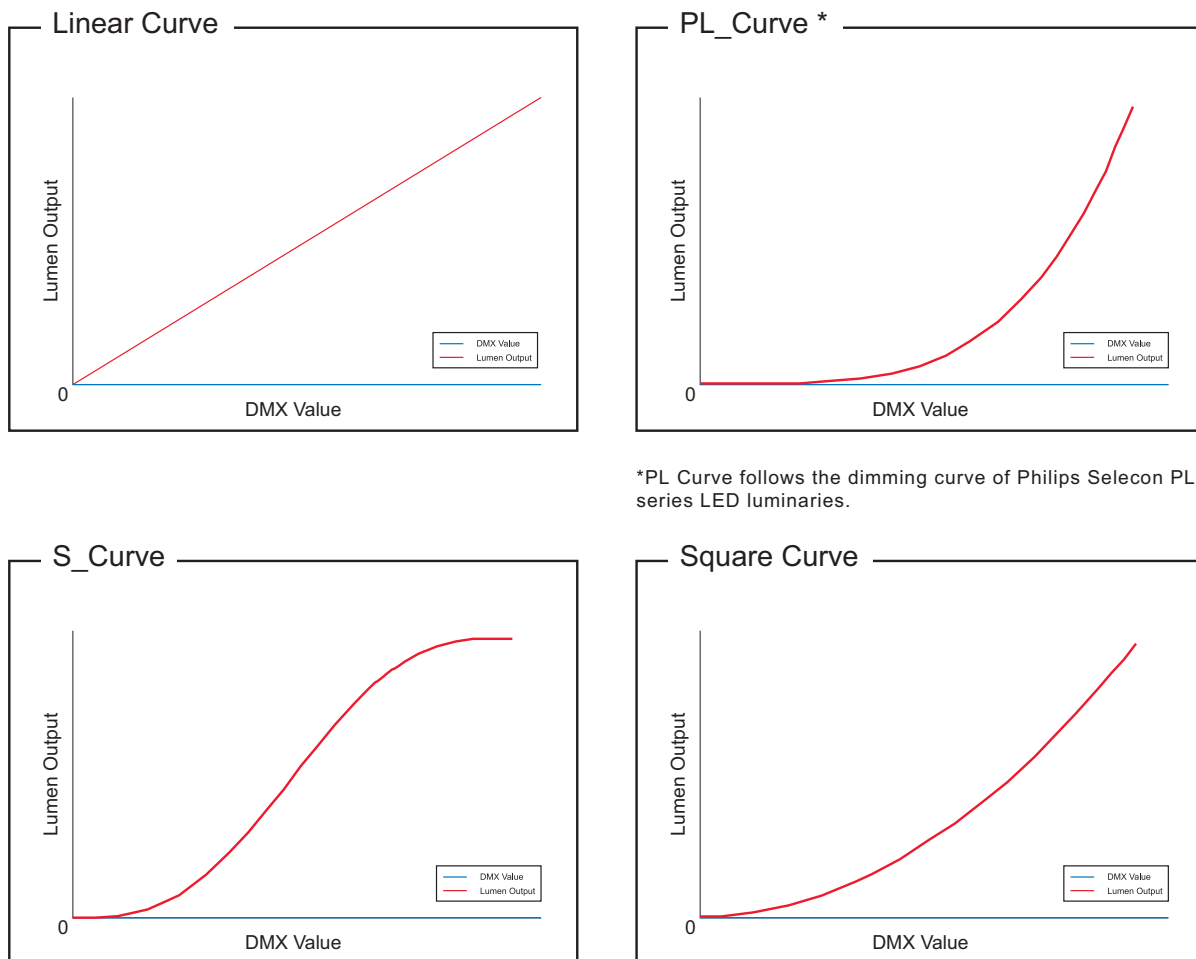

Figure 14: SL BAR 520 RGBW LED Luminaire Dimmer Curves

## 6. Master / Slave Operational Mode

The Master / Slave Operational Mode allows one SL BAR 520 RGBW LED Luminaire to act as the "Master" unit and all other connected units are controlled by this unit. When a unit is set to "Slave" mode, it will only listen to and follow any commands sent from a "Master" unit. Only one "Master" unit is allowed in this type of operation.

### To setup a master / slave network:

- Step 1. Set the first device in the DMX512 chain to **Master Mode** through the unit's menu system.
- Step 2. Set all other connected units to **Slave Mode**.
- Step 3. The master unit can be controlled via DMX512, RDM or through standalone operation (self-contained network utilizing on-board effects). The slave units will mimic the master unit's operation in all cases.

**Note:** For more information on DMX512 networking and systems, refer to "[Additional Resources for DMX512](#)" on [page 1](#). For SL BAR 520 RGBW LED Luminaire DMX Mapping, refer to "[DMX CONTROL](#)" on [page 27](#).

**Figure 15: SL BAR 520 RGBW LED Luminaire - Master / Slave Configuration**

## DMX CONTROL

This section contains information for operating the luminaire using DMX control in 16-bit, RGBW 8-Bit, Simple RGBW 8-bit, or HSIC (Hue, Saturation, Intensity and Color Correction) modes. For Menu options and detailed information, see "LCD Display and Menu System" on page 16.

**Note:** These tables assume a DMX start address of 1. When a different starting address is used, this address becomes channel 1 function and other functions follow in sequence.

### 1. 16-Bit Mode

Table 15 provides DMX channel mapping of all DMX512 control values when the SL BAR 520 RGBW LED Luminaire is in 16-bit DMX512 mode (as set by the luminaire's menu system).

**Table 15: SL BAR 520 RGBW LED Luminaire DMX Channel Mapping (16-Bit Mode)**

DMX Channel	Parameter	Range DMX	Range%	Default - recommended console default values	Description
1	Master Intensity - High	0 - 65535	0 - 100%	0	16-bit control for Intensity of LED settings.
2	Master Intensity - Low				
3	Color Presets	0 - 255	0 - 100%	0	<p>Select presets, variable color filters or chases as follows:</p> <p>Channel OFF (disabled) DMX 0 - 4            Preset 0 (OFF) DMX 5 - 6            Preset 1 DMX 7 - 8            Preset 2 DMX 9 - 10            Preset 3 DMX 11 - 12            Preset 4 DMX 13 - 14            Preset 5 DMX 15 - 16            Preset 6 DMX 17 - 18            Preset 7 DMX 19 - 20            Preset 8 DMX 21 - 22            Preset 9 DMX 23 - 24            Preset 10 DMX 25 - 26            Preset 11 DMX 27 - 28            Preset 12 DMX 29 - 30            Preset 13 DMX 31 - 32            Preset 14 DMX 33 - 34            Preset 15 DMX 35 - 36            Preset 16 DMX 37 - 38            Preset 17 DMX 39 - 40            Preset 18 DMX 41 - 42            Preset 19 DMX 43 - 44            Preset 20 DMX 45 - 46            Preset 21 DMX 47 - 48            Preset 22 DMX 49 - 50            Preset 23 DMX 51 - 52            Preset 24 DMX 53 - 54            Preset 25 DMX 55 - 56            Preset 26 DMX 57 - 58            Preset 27 DMX 59 - 60            Preset 28 DMX 61 - 62            Preset 29 DMX 63 - 64            Preset 30 DMX 65 - 66            Preset 31 DMX 67 - 68            CF_0_Color OFF DMX 69 - 70            CF_1_White 10000K DMX 71 - 72            CF_2_White 8000K DMX 73 - 74            CF_3_White 6500K DMX 75 - 76            CF_4_White 5600K DMX 77 - 78            CF_5_White 5000K DMX 79 - 80            CF_6_White 4500K DMX 81 - 82            CF_7_White 4000K DMX 83 - 84            CF_8_White 3200K DMX 85 - 86            CF_9_White 3000K DMX 87 - 88            CF_10_White 2700K DMX 89 - 90</p> <p><i>Continued next page</i></p>

**Note:** Refer to previous DMX mapping information for Color Presets, Strobe, Duration, Intensity Timing, Color Timing, and Control channels.

## 9. SL BAR 520 RGBW LED Luminaire DMX Timing Channel Detail

Timing channel control improves the timed moves of certain groups of parameters. The SL BAR 520 RGBW LED Luminaire provides timing channels in 16-bit mode (one for intensity time and one for color time) and one timing channel in 8-bit (color and intensity timing combined). The luminaire uses its timing channel value to calculate a smooth continuous operation for a given time and transition.

### Guidelines:

- Timing channels support time values from zero to 60 minutes.
- To use a timing channel instead of console timing, it is recommended to set the timing channel to the desired value and set cue and/or console cue fade time to zero. A combination of time controls can produce unexpected results.
- The default value setting in the profile should be 255 (proportional control) to allow smooth operation when using console timing.
- The timing channel data should change as a snap. A zero value will give the fastest operation, however, without any smoothing this can appear "steppy" in console timed moves.

Refer to "[SL BAR 520 RGBW LED Luminaire DMX Timing Channel Detail](#)" for more information.

# CLEANING AND CARE

---

**WARNING!** All cleaning should be performed with power completely removed from the luminaire. Never remove protective covers when luminaire is powered. Wear appropriate protective eye wear and gloves when cleaning the fixture. All service and maintenance, other than described herein, should be performed by a qualified technician or Authorized Service Center.

---

## 1. Special Cleaning and Care Instructions

Being a solid-state fixture, and unlike most fixtures, the SL BAR 520 RGBW LED Luminaire requires very little routine maintenance by the user. This section covers portions of the luminaire that can be removed for cleaning.

The SL BAR 520 RGBW LED Luminaire special care when it comes to cleaning front lens assembly. Additional care needs to be taken with the plastic components because they are much easier to scratch or damage than glass.

The following is a list of cleaning materials required to care for your SL BAR 520 RGBW LED Luminaire:

- Lint free lens tissue
- Lint or powder free gloves
- Reagent grade isopropyl alcohol\*
- A mild soap solution.

**Note:** \*Reagent grade isopropyl alcohol is good to use on the SL BAR 520 RGBW LED Luminaire plastic optics with anti-reflection coatings.

---

If the lens is still dirty after using isopropyl alcohol, for instance if fingerprints or oil is just redistributed and not cleaned off the optic, then a mild soap and water solution can be used to gently wash the lens. Repeat the cleaning with isopropyl alcohol to eliminate streaks and soap residue.

---

**WARNING!** Under no circumstances should ammonia-based cleaners, acetone, or other harsh solvents be used on or near the SL BAR 520 RGBW LED Luminaire. These types of cleaners or solvents can permanently damage the optics or housings of the fixture.

---

If you have any questions regarding the use or care of your SL BAR 520 RGBW LED Luminaire, please contact Showline technical support or your local Authorized Dealer.

## 2. Front Lens Cleaning

**To clean the front lens:**

- Step 1. Disconnect luminaire from power and allow to cool completely.
- Step 2. Apply a small amount of reagent grade isopropyl alcohol to lint-free lens tissue.
- Step 3. Wipe all debris, dirt, fingerprints, etc. from lens.
- Step 4. Using a second lint-free lens tissue, wipe off any alcohol residue.

## 3. Service and Maintenance

For all other service and maintenance issues, please contact your local Showline office or an Authorized Service Center.

---

**WARNING!** Disassembly (other than as described herein), alterations, unauthorized service, etc. will void the product warranty. Contact your local Showline office or an Authorized Service Center for technical support and service.

---

# TECHNICAL SPECIFICATIONS

## 1. SL BAR 520 RGBW LED Luminaire Operational Specifications

Source:	Color RGBW LED Array (x6 - 40 Watt High Power LED Chipsets)
Beam Angle:	8 Degrees
Light Output:	> 8,000 lumens
Color Temperature:	2700 - 6500K (user adjustable)
Input Voltage (AC):	100V to 240V (+/- 10%, auto-ranging)
Current (AC):	3.00 Amps (100V) / 1.25 Amps (240V)
Frequency:	50/60Hz
Control Protocols:	DMX512 (1990) / DMX512A (RDM) / On-Board Menu
Ambient Temperature:	-20 to 40 Degrees C (-4 to 104 Degrees F)
Humidity:	5%-95% Non condensing
Cooling:	Forced Air Cooling
Weight:	19.4 lbs (8.8 kg) - Luminaire only (no accessories)
Housing:	Die Cast Aluminium with Powder Coating
Compliance:	cETLus Marked (North American models) and CE Marked (International models)
IP Rating:	IP20

**Note:** Common model specifications shown. For specific model specifications, features, and accessories, refer to the product specification sheet for more details.
