# IMPORTANT INFORMATION

## Warnings and Notices

When using electrical equipment, basic safety precautions should always be followed including the following:

- a. **READ AND FOLLOW ALL SAFETY INSTRUCTIONS.**
- b. Do not use outdoors.
- c. Do not mount near gas or electric heaters.
- d. Equipment should be mounted in locations and at heights where it will not readily be subjected to tampering by unauthorized personnel.
- e. The use of accessory equipment not recommended by the manufacturer may cause an unsafe condition.
- f. Do not use this equipment for other than intended use.
- g. Refer service to qualified personnel.

**SAVE THESE INSTRUCTIONS.**

**WARNING:** You must have access to a main circuit breaker or other power disconnect device before installing any wiring. Be sure that power is disconnected by removing fuses or turning the main circuit breaker off before installation. Installing the device with power on may expose you to dangerous voltages and damage the device. A qualified electrician must perform this installation.

**WARNING:** Refer to National Electrical Code® and local codes for cable specifications. Failure to use proper cable can result in damage to equipment or danger to personnel.

**WARNING:** This equipment is intended for installation in accordance with the National Electric Code® and local regulations. It is also intended for installation in indoor applications only. Before any electrical work is performed, disconnect power at the circuit breaker or remove the fuse to avoid shock or damage to the control. It is recommended that a qualified electrician perform this installation.

## PREFACE

### 1. About this Manual

The document provides installation and operation instructions for the following products:

- SL STRIP 400 TW LED Luminaire (IP20 rated)

Please read all instructions before installing or using this product. *Retain this manual for future reference*. Additional product information and descriptions may be found on the product specification sheet.

**Note:** The SL STRIP 400 TW LED Luminaire is universal voltage 100 to 240 VAC (auto-ranging).

### 2. Included Items

Each SL STRIP 400 TW LED Luminaire includes the following items:

- SL STRIP 400 TW LED Luminaire
- PC1BE - AC Power Input Cable (39 inches / 1 meter), Powercon with Bare End\* (\*Note, user supplies and installs own AC input connector)
- Installation and User's Manual (*this document*)

#### SL STRIP 400 TW LED Luminaire Power Input Cables (North American Models Only)

# SL STRIP 400 TW LED LUMINAIRE OVERVIEW

## 1. SL STRIP 400 TW LED Luminaire Components

### Major Luminaire Components

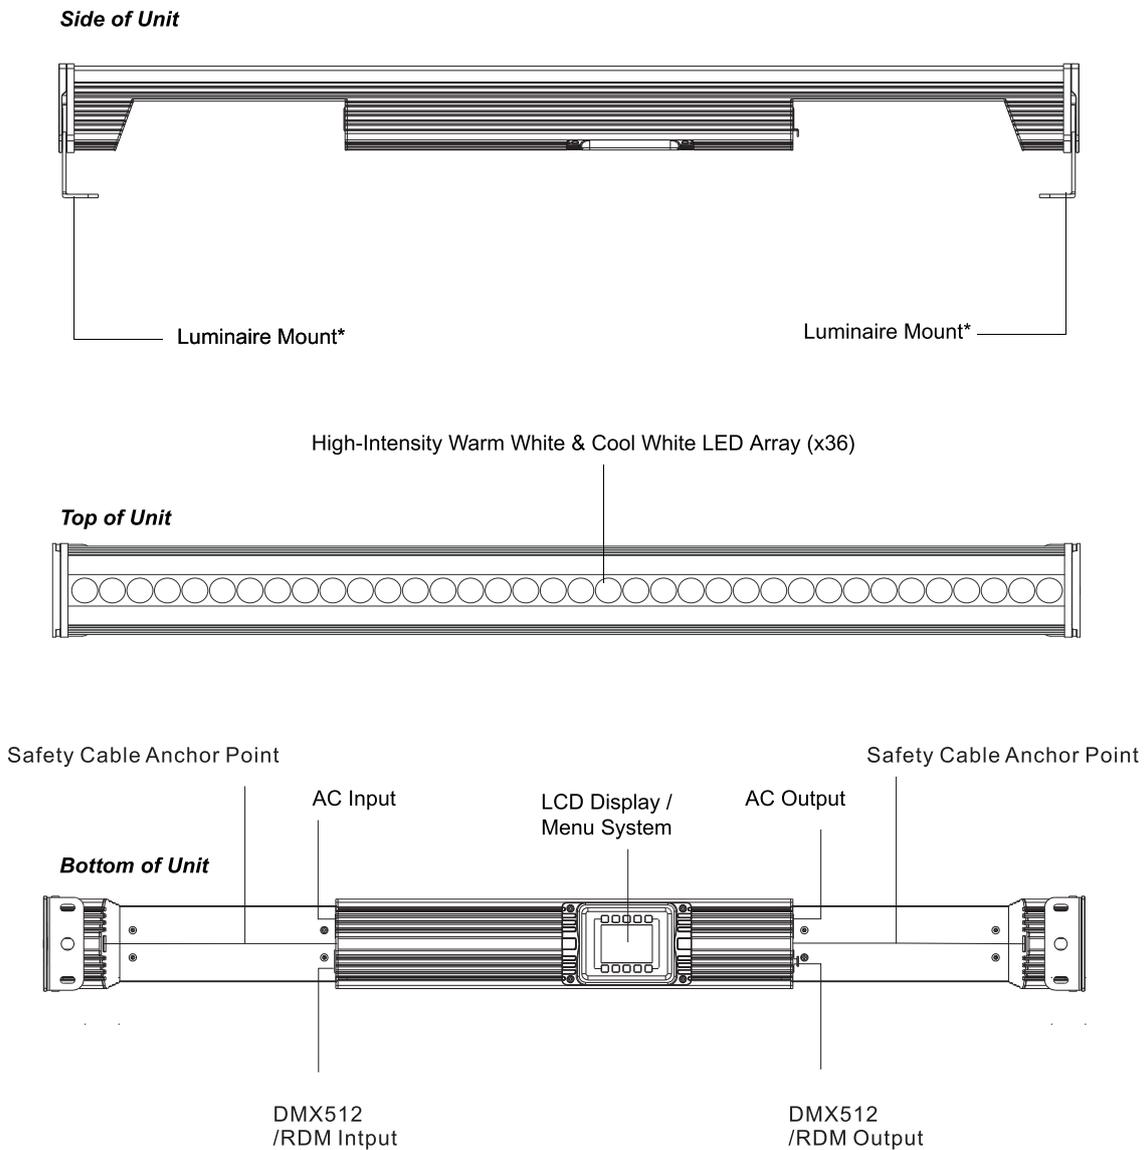

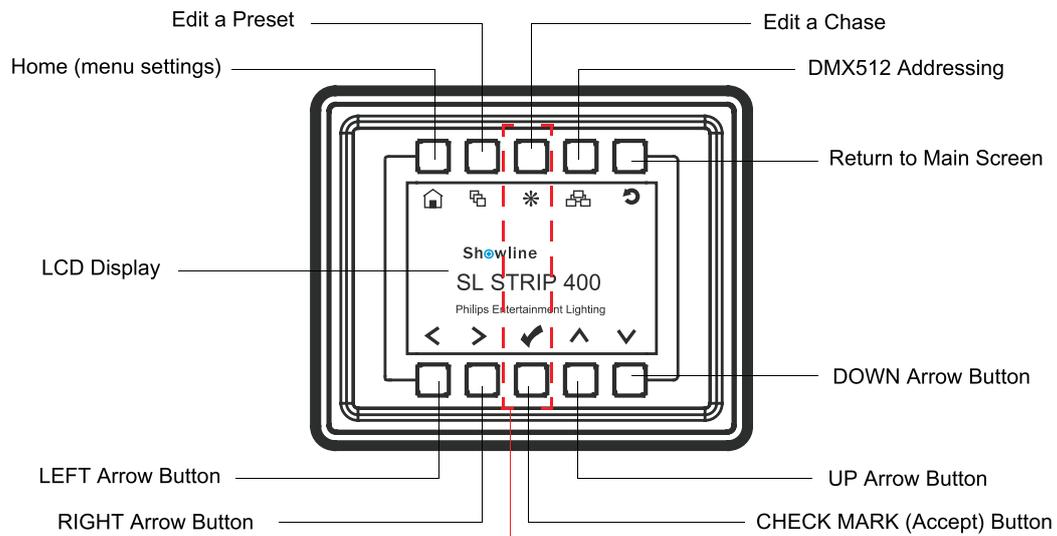

Figure 1: SL STRIP 400 TW LED Luminaire Components

**Note:** \*Mounts can be removed and reversed. See “Mounting Luminaire” on page 9 for more information.

## LCD Display / Menu System

**NOTE:** Menu rotates with orientation of luminaire and menu buttons are always in the same position (with rotation of menu)

To rotate menu 180 degrees from current orientation, press and hold the two center buttons for 2 seconds.

**Figure 2: LCD Display & Menu System**

**Note:** For Menu operation and programming details, refer to “LCD Display and Menu System” on page 11.

# INSTALLATION AND SET UP

## 1. Power Requirements

The SL STRIP 400 TW LED Luminaire operates on AC input voltages from 100 to 240 VAC. The unit is supplied with an AC input cable without an input connector. Input connector is a user-supplied accessory to fit your application.

**WARNING!** This unit does not contain an ON/OFF switch. Always disconnect power input cable to completely remove power from unit when not in use.

### AC Power Operation

When connected to an AC source, the unit operates on 100 to 240 volts AC(+/- 10%, auto-ranging). The luminaire contains an auto-ranging power supply. Each luminaire can draw up to 95 Watts.

**WARNING!** Maximum amount of units that may be daisy-chained is (A) 17 units 100 ~ 120VAC or (B) 32 units 230 ~ 240VAC(10 Amps).

**Table 1: SL STRIP 400 TW LED Luminaire Voltage (VAC) vs. Current\***

Voltage (AC)	Total Current (A)	Voltage (AC)	Total Current (A)
100	0.95	180	0.53
110	0.86	190	0.50
120	0.79	200	0.48
130	0.73	210	0.45
140	0.67	220	0.43
150	0.63	230	0.41
160	0.59	240	0.40
170	0.56		

**Note:** For wiring of AC input connector, refer to “[Connecting SL STRIP 400 TW LED Luminaires to AC Power](#)” on page 7.

## 2. Connecting Power

Units can be powered in one of two ways:

- Direct connection to a AC power source using an AC input cable. For wiring of AC input connector, refer to “[Connecting SL STRIP 400 TW LED Luminaires to AC Power](#)” on page 7.
- Connection from the AC output of another SL STRIP 400 TW LED Luminaire. When using this method, it is very important not to connect any other type of equipment device.

**WARNING!** Only connect other SL STRIP 400 TW LED Luminaires to the AC Output (Thru) connector of a SL STRIP 400 TW LED Luminaire.

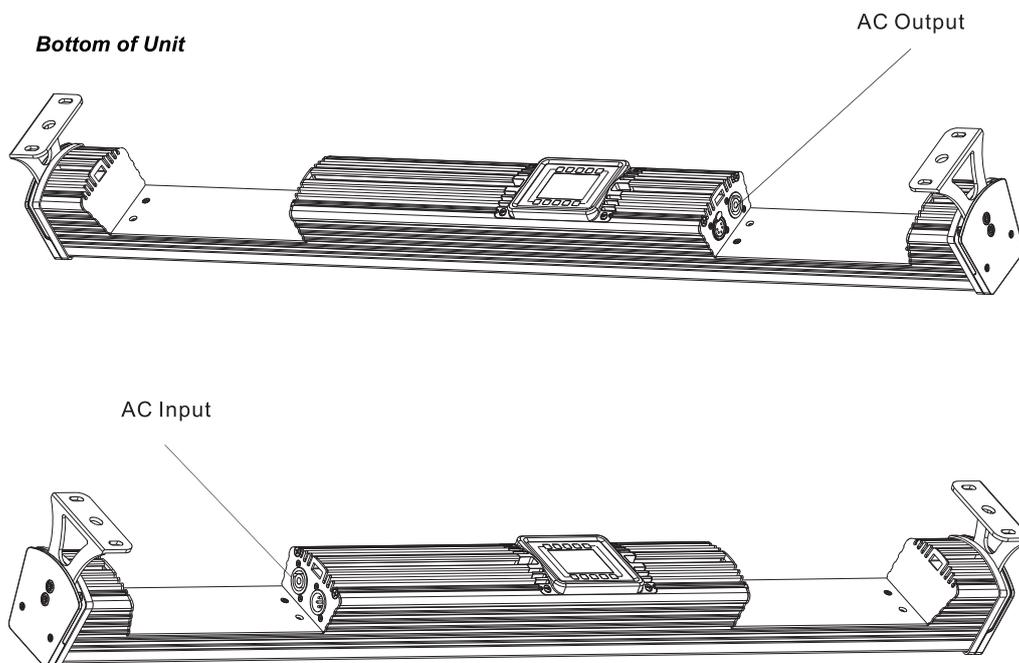

## Connecting SL STRIP 400 TW LED Luminaires to AC Power

The unit is supplied with an AC input cable without an input connector. Input connector is a user-supplied accessory to fit your application.

Table 2 describes how to connect power to your SL STRIP 400 TW LED Luminaire. Field wiring of the SL STRIP 400 TW LED Luminaire is straight forward. A total of 3 wires/conductors is supplied from the unit. The following wiring scheme is used:

**Table 2:** SL STRIP 400 TW LED Luminaire (IP20 Rated Models) AC Input Connections

Wire Color	Purpose
Brown	Main / Line (100 to 240VAC)
Blue	Neutral
Green/Yellow	Ground (Earth)

**Figure 3:** SL STRIP 400 TW LED Luminaire AC Input & Output Connections

---

**CAUTION:** In the event the AC input cable of this luminaire is damaged, it must be replaced, by the user, with an approved cable through an Authorized Showline Dealer or Service Center.

---

### 3. Connecting to the DMX512 Network

Basic DMX512 installation consists of connecting multiple SL STRIP 400 TW LED Luminaires together (up to 32 luminaires) in “daisy-chain” fashion. A cable runs from the control console (or DMX512 control source) to the DMX connector on the first SL STRIP 400 TW LED Luminaire. Another cable runs from the other DMX connector on the first unit to a DMX connector on the next SL STRIP 400 TW LED Luminaire (or DMX512 device to be controlled).

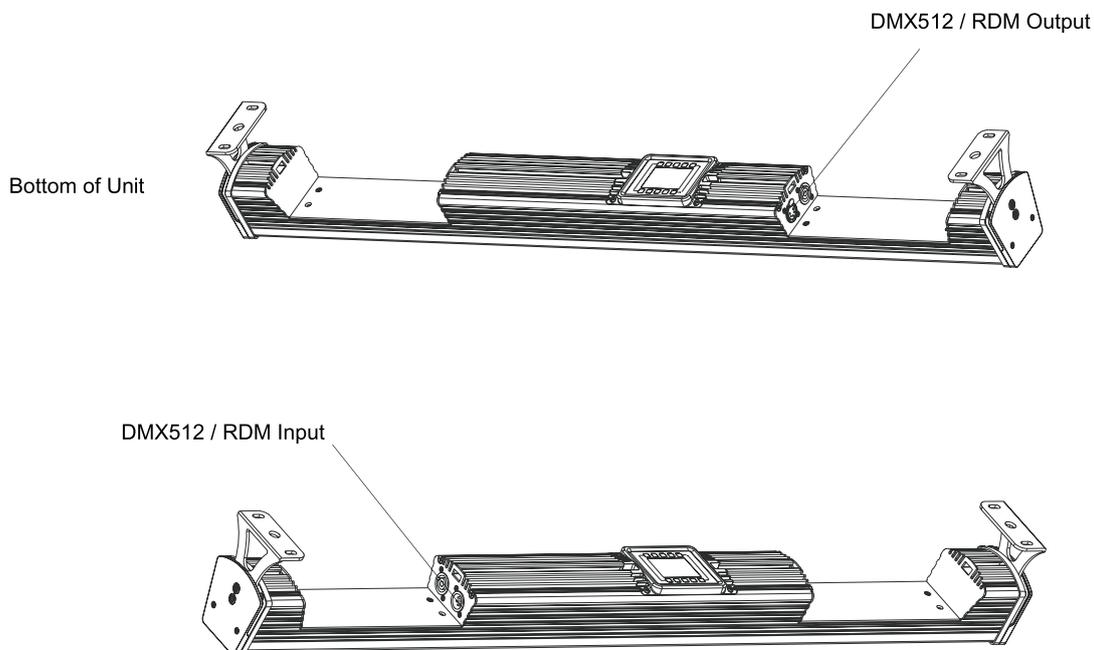

Figure 4: SL STRIP 400 TW LED Luminaire DMX512 Input/Output Connections

**Note:** For more information on DMX512 networking and systems, refer to “Additional Resources for DMX512” on page 1. For SL STRIP 400 TW LED Luminaire DMX Mapping, refer to “DMX CONTROL” on page 17.

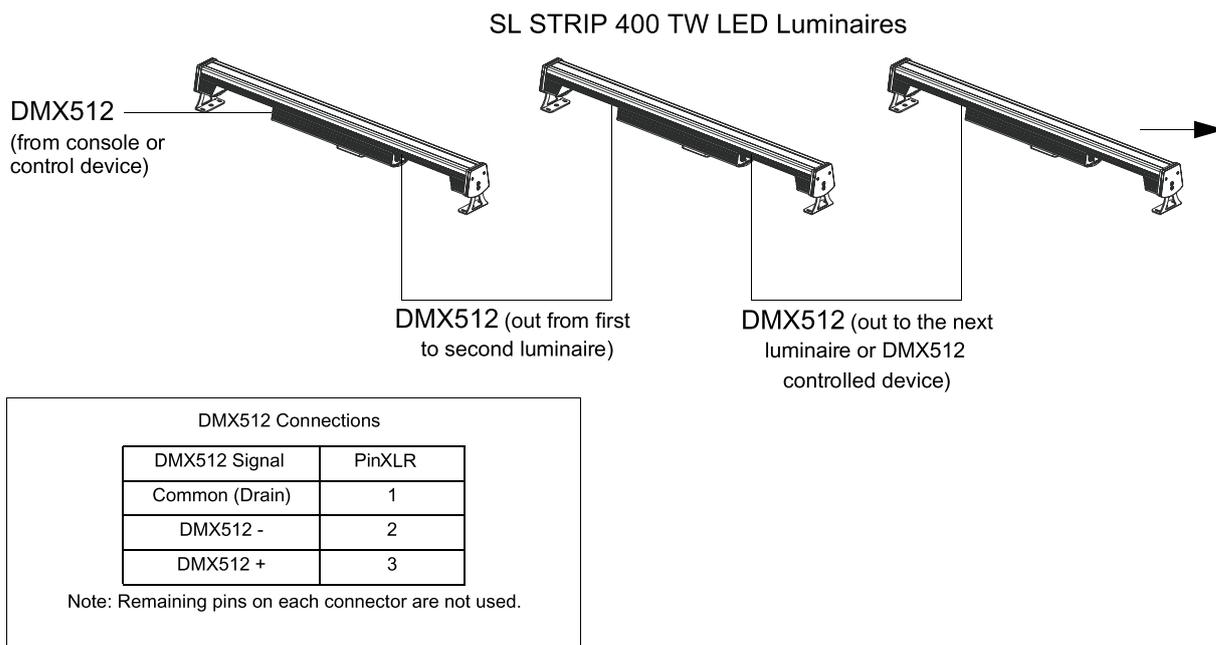

Figure 5: SL STRIP 400 TW LED Luminaire - DMX512 Connections

## 4. Mounting Luminaire

The SL STRIP 400 TW LED Luminaire is provided with two mounts and a safety cable anchor point (as described in “Major Luminaire Components” on page 4 and figure 7 on page 10).

The two mounts are easily removed and reserved as required (as illustrated in **Figure 6**). These mounts are designed to accept a variety of mounting hooks, clamps, etc. for hanging applications or can be set on the mounts for floor applications. Refer to Figure 7 for additional information.

---

**Note:** Mounting hooks, clamps, etc. are sold separately or by others. For available mounting accessories refer to “SL STRIP 400 TW LED Luminaire Accessories” on page 3.

---

# OPERATION AND PROGRAMMING

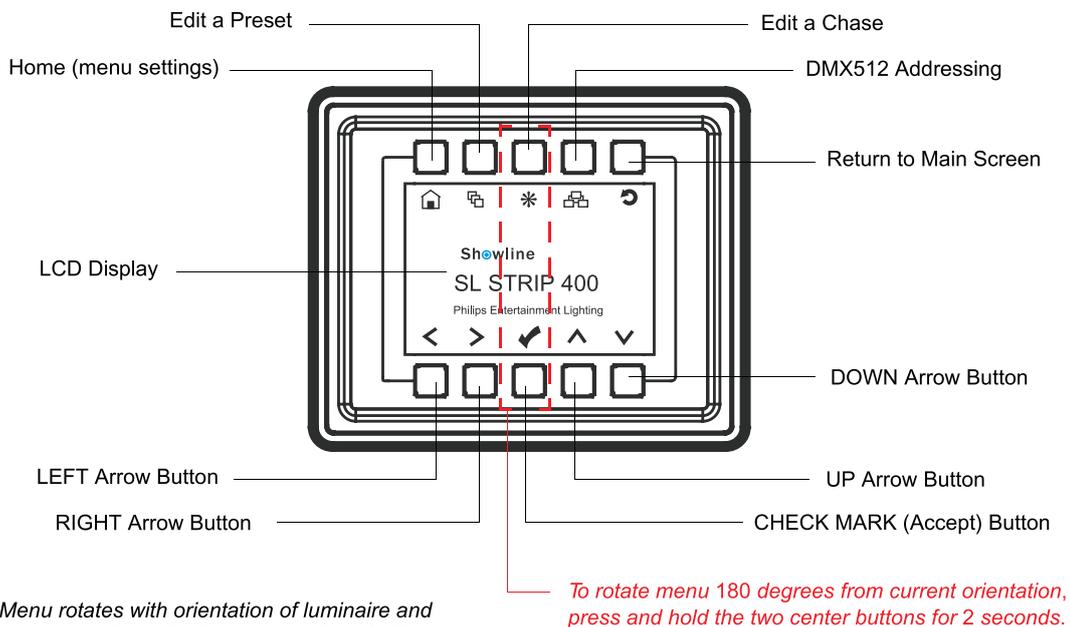

## 1. LCD Display and Menu System

The SL STRIP 400 TW LED Luminaire's LCD Display and Menu System provides local control for accessing the following fixture's setting:

- Presets (Standard and User Defined)
- Effects (Chases - preloaded and user defined)
- Strobe / Timing
- Fixture Settings
- Fixture Lockout (to prevent changes)
- Password Setting
- Current Fixture Operational Status
- Setting the DMX512 Address

**Note:** If there are multiple luminaires in a system, changes would need to be made at each LCD Menu as desired.

Upon power up, the LCD will display the main screen showing the product type/name. If DMX is enabled, the programmed address will appear after power up.

**NOTE:** Menu rotates with orientation of luminaire and menu buttons are always in the same position (with rotation of menu)

Figure 8: LCD Display and Menu System

## 2. LCD Display and Menu System Operation

The LCD Display Menu system consists of several categories. Use the Menu Buttons to access and make changes to the menu items. When the desired menu item is reached, press the desired Menu Button to display the menu options and to navigate and configure the menu options as required.

**To navigate and access menu settings / selections:**

- Step 1. Make sure unit is powered and turned on.
- Step 2. Press the desired button (as shown in **Figure 9**) to access menu categories.
- Step 3. Use UP |DOWN |LEFT |RIGHT arrow buttons to navigate through the various options and settings.
- Step 4. Make changes as desired.
- Step 5. Press CHECK MSRK (OK) button to accept changes.

### 3. Quick Selection Buttons

When in Manual Mode, the SL STRIP 400 TW's features can be accessed via the on-board LCD menu system or via three quick select buttons:

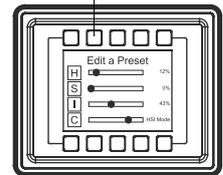

- Edit a Preset Button
- Edit a Chase Button
- DMX Address Button

#### Edit a Preset Button

**To edit and save a preset:**

- Step 1. Press Edit a Preset button. Current preset will be shown.
- Step 2. Use LEFT and RIGHT arrow buttons to scroll through all presets.
- Step 3. Once at desired preset, use UP and DOWN arrows to access (highlight) preset parameters. Once in desired parameter, use LEFT and RIGHT arrow buttons to adjust parameter value as desired.
- Step 4. Once all values are adjusted as desired, press OK (Check Mark) button.
- Step 5. Save preset menu option will appear. Use LEFT and RIGHT arrow buttons to select preset number.
- Step 6. If saving preset, press OK (Check Mark) button. Confirm choice.
- Step 7. Preset is now saved.

Edit a Preset

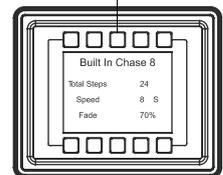

#### Edit a Chase Button

**To edit and save a chase:**

- Step 1. Press Edit a Chase button. Current chase will be shown.
- Step 2. Use LEFT and RIGHT arrow buttons to scroll through all chases (Built In and User Chases).

Edit a Chase

**Note:** For Built In Chases, only the Speed and Fade parameters may be changed and saved. For User Chases, Chase Number, Total Steps, Speed, and Fade Parameters may be changed and saved.

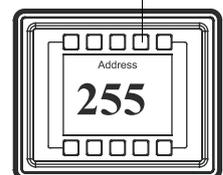

- Step 3. Once at desired chase, use UP and DOWN arrows to access (highlight) chase parameters. Once in desired parameter, use LEFT and RIGHT arrow buttons to adjust parameter value as desired.
- Step 4. Once all values are adjusted as desired, press OK (Check Mark) button.
- Step 5. Save chase menu option will appear. Use LEFT and RIGHT arrow buttons to select chase number.
- Step 6. If saving chase, press OK (Check Mark) button. Confirm choice.
- Step 7. Chase is now saved.

#### DMX Address Button

**To edit and save a DMX address:**

- Step 1. Press DMX Address button. Current DMX Address will be shown.
- Step 2. Press OK (Check Mark) button to highlight a digit in the DMX address.
- Step 3. Use LEFT and RIGHT arrow buttons to scroll through all digits.
- Step 4. Once at desired digit, use UP and DOWN arrows to change highlighted digit. Once digit is set, use LEFT and RIGHT arrow buttons to set other digits in DMX address.
- Step 5. Once all digits are set in DMX address, press OK (Check Mark) button.
- Step 6. DMX will display and is saved.

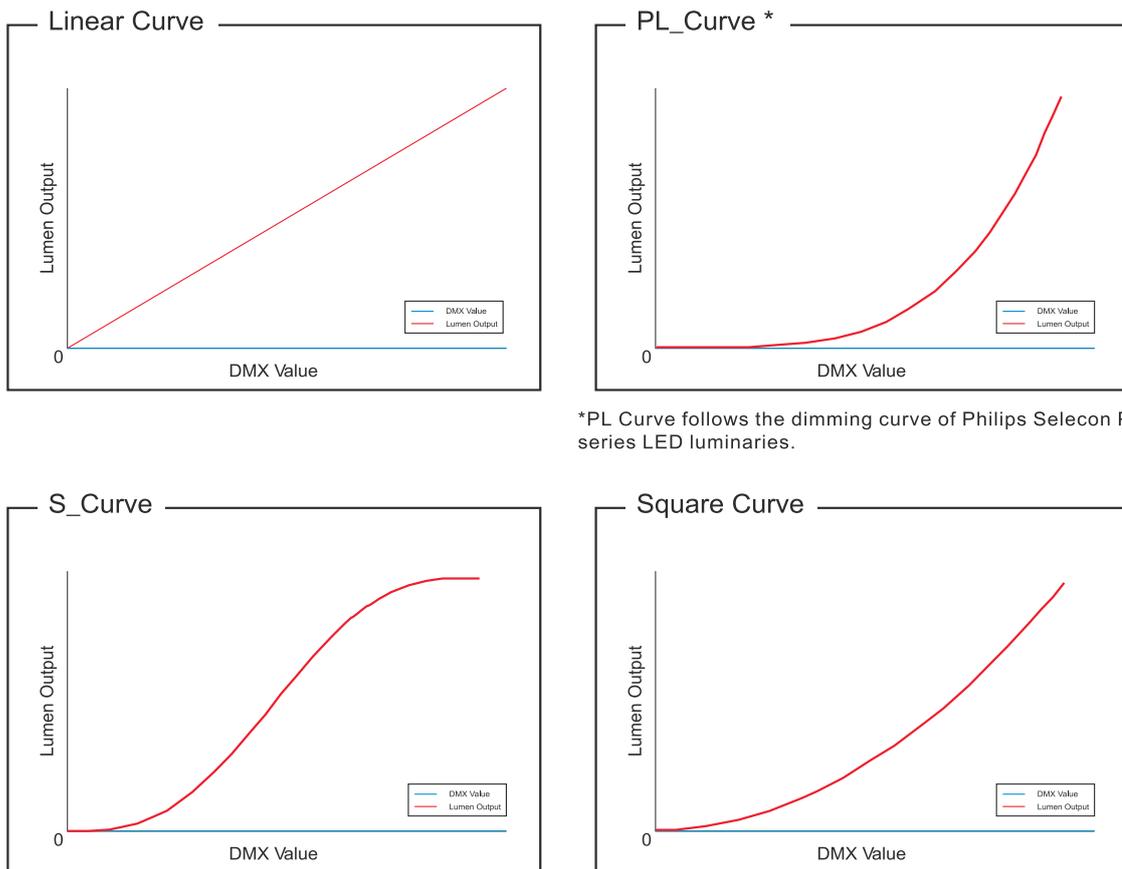

DMX Address

## 4. Dimming Curve Selection

Through the menu, you are able to select one of four dimming curves:

- Linear Curve
- PL\_Curve
- S\_Curve
- Square Curve

**Figure 11: SL STRIP 400 TW LED Luminaire Dimmer Curves**

## 5. Master / Slave Operational Mode

The Master / Slave Operational Mode allows one SL STRIP 400 TW LED Luminaire to act as the “Master” unit and all other connected units are controlled by this unit. When a unit is set to “Slave” mode, it will only listen to and follow any commands sent from a “Master” unit. Only one “Master” unit is allowed in this type of operation.

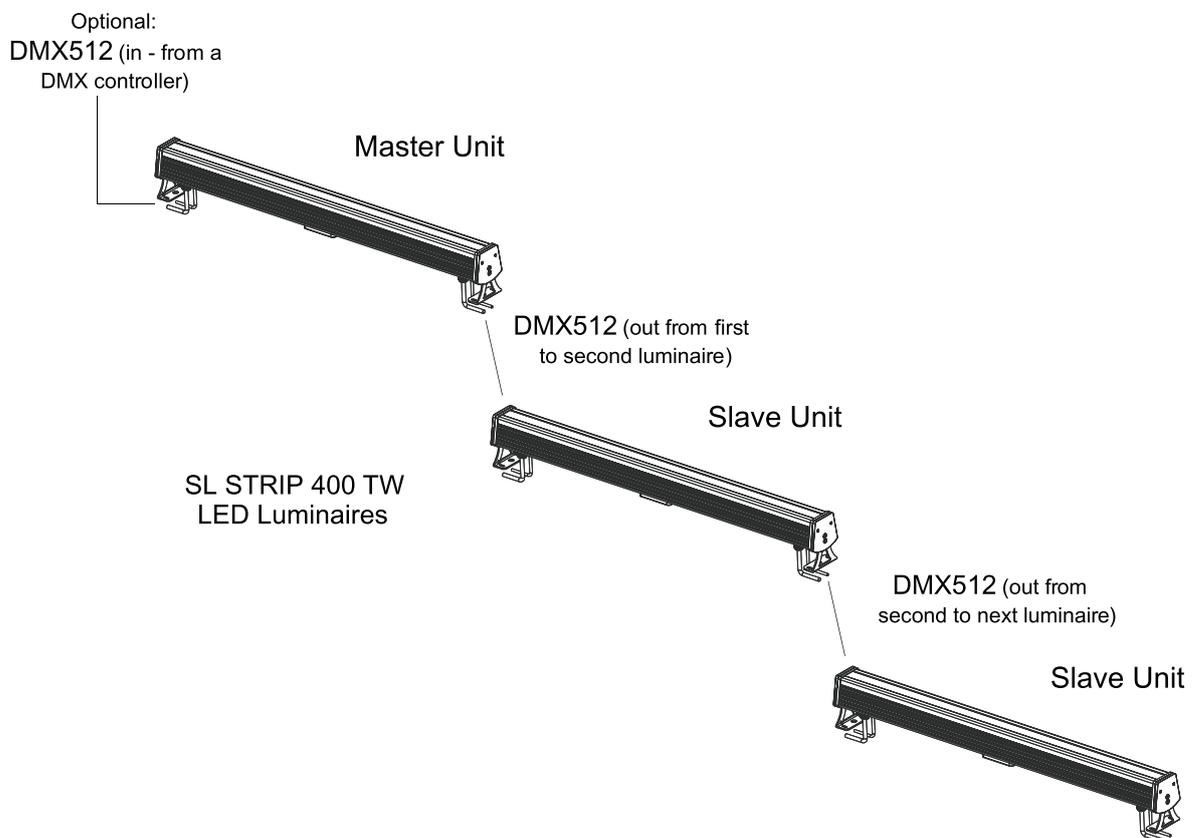

### To setup a master / slave network:

- Step 1. Set the first device in the DMX512 chain to **Master Mode** through the unit's menu system.
- Step 2. Set all other connected units to **Slave Mode**.
- Step 3. The master unit can be controlled via DMX512, RDM or through standalone operation (self-contained network utilizing on-board effects). The slave units will mimic the master unit's operation in all cases.

---

**Note:** For more information on DMX512 networking and systems, refer to “[Additional Resources for DMX512](#)” on page 1. For SL STRIP 400 TW LED Luminaire DMX Mapping, refer to “[DMX CONTROL](#)” on page 17.

---

**Figure 12: SL STRIP 400 TW LED Luminaire - Master / Slave Configuration**

## DMX CONTROL

This section contains information for operating the luminaire using DMX control in 16-bit, 8-bit modes. For Menu Options and detailed information, see “LCD Display and Menu System” on page 11.

**Note:** These tables assume a DMX start address of 1. When a different starting address is used, this address becomes channel 1 function and other functions follow in sequence.

### 1. SL STRIP 400 TW LED Luminaire DMX Mapping

SL STRIP 400 TW LED Luminaires offer multiple types of DMX mapping as set at the luminaire's menu system. Please make sure you have set your luminaire to and are following the desired DMX mapping for your application.

## 2. DMX Timing channel Detail

Timing channel control improves the timed moves of certain groups of parameters. The SL STRIP 400 TW LED Luminaire provides timing channels in 16-bit mode (one for intensity time and one for color time) and one timing channel in 8-bit (color and intensity timing combined). The luminaire uses its timing channel value to calculate a smooth continuous operation for a given time and transition.

### Guidelines:

- Timing channels support time values from zero to 60 minutes.
- To use a timing channel instead of console timing, it is recommended to set the timing channel to the desired value and set cue and/ or console cue fade time to zero. A combination of time controls can produce unexpected results.
- The default value setting in the profile should be 255 (proportional control) to allow smooth operation when using console timing.
- The timing channel data should change as a snap. A zero value will give the fastest operation, however, without any smoothing this can appear "steppy" in console timed moves.

## CLEANING AND CARE

---

**WARNING!** All cleaning should be performed with power completely removed from the luminaire. Never remove protective covers when luminaire is powered. Wear appropriate protective eye wear and gloves when cleaning the fixture. All service and maintenance, other than described herein, should be performed by a qualified technician or Authorized Service Center.

---

### 1. Special Cleaning and Care Instructions

Being a solid-state fixture, and unlike most fixtures, the SL STRIP 400 TW LED Luminaire requires very little routine maintenance by the user. This section covers portions of the luminaire that can be removed for cleaning.

The SL STRIP 400 TW LED Luminaire special care when it comes to cleaning front lens assembly. Additional care needs to be taken with the plastic components because they are much easier to scratch or damage than glass.

The following is a list of cleaning materials required to care for your SL STRIP 400 TW LED Luminaire:

- Lint free lens tissue
- Lint or powder free gloves
- Reagent grade isopropyl alcohol\*
- A mild soap solution.

**Note:** \*Reagent grade isopropyl alcohol is good to use on the SL STRIP 400 TW LED Luminaire plastic optics with anti-reflection coatings.

---

If the lens is still dirty after using isopropyl alcohol, for instance if fingerprints or oil is just redistributed and not cleaned off the optic, then a mild soap and water solution can be used to gently wash the lens. Repeat the cleaning with isopropyl alcohol to eliminate streaks and soap residue.

---

**WARNING!** Under no circumstances should ammonia-based cleaners, acetone, or other harsh solvents be used on or near the SL STRIP 400 TW LED Luminaire. These types of cleaners or solvents can permanently damage the optics or housings of the fixture.

---

If you have any questions regarding the use or care of your SL STRIP 400 TW LED Luminaire, please contact Showline technical support or your local Authorized Dealer.

### 2. Front Lens Cleaning

**To clean the front lens:**

- Step 1. Turn off luminaire and allow to cool completely.
- Step 2. Apply a small amount of reagent grade isopropyl alcohol to lint-free lens tissue.
- Step 3. Wipe all debris, dirt, fingerprints, etc. from lens.
- Step 4. Using a second lint-free lens tissue, wipe off any alcohol residue.

### 3. Service and Maintenance

For all other service and maintenance issues, please contact your local Showline office or an Authorized Service Center.

---

**WARNING!** Disassembly (other than as described herein), alterations, unauthorized service, etc. will void the product warranty. Contact your local Showline office or an Authorized Service Center for technical support and service.
