

CONTROL SYSTEM and ACCESSORIES indoor

Wall pilot station for DMX system

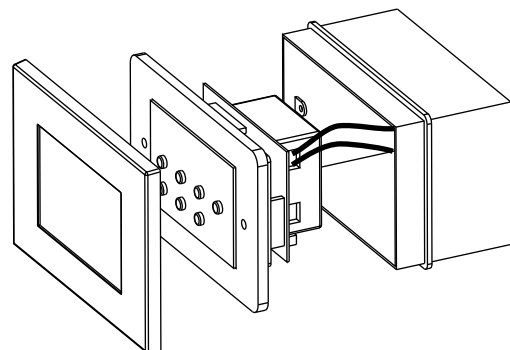

Wall pilot station è in grado di controllare gli apparecchi di illuminazione predisposti per la gestione del cambio colore con sistema DMX. Può essere installata in una normale scatola standard da incasso a parete. Un LED frontale permette di visualizzare il colore o la sequenza selezionati.

Wall pilot station manages fittings suitable for colour changing with DMX systems. It can be installed in a standard box for recessed mounting. Frontal RGB LED allows to visualize the selected sequence or colour.

- Scatola da incasso standard 3 posti: 104x68x50mm
(NON FORNITA)

- Standard swicht-box: 104x68x50mm
(NOT SUPPLIED)
