

PHILIPS

Lighting
Fundamentals

2015 Canada Philips Lighting Application Center Course Description

Lighting Fundamentals **Workshops**

The 3-day workshop offers a practical understanding of the principles of lighting and an introduction to today's lighting technologies, including sources, luminaires, and controls.

We take an interactive, experience-based and participant-centered approach, using full-scale, hands-on demonstrations, and lots of practice. Participants see lighting in action, explore how lighting systems work, and measure and evaluate lighting alternatives.

Workshop Agenda

- Understanding and applying recommended practice
- The critical qualities of light
- Illuminance selection
- Appropriate lighting systems

Who Should Attend

This program is aimed at the needs of the lighting novice in a range of disciplines: electrical distribution, contracting, interior and architectural design, facility management, energy and utility service, or any other practitioners interested in learning the fundamentals of lighting.

Canadian Workshop Fee: \$695 Canadian Dollars — [Register Now](#)

Location: LCC, Toronto

Scheduled dates:
September 21-23
