

**PHILIPS**

Lighting  
Fundamentals

2015 Canada Philips Lighting Application Center Course Description

# Lighting Essentials for Philips **Distributors**

The 4-day workshop offers a practical understanding of the principles of lighting and an introduction to today's lighting technologies, including sources, luminaires, and controls.

We take an interactive, experience-based and participant-centered approach, using full-scale, hands-on demonstrations, and lots of practice. Participant see lighting in action, explore how lighting systems work, and measure and evaluate lighting alternatives.
