MultiOne
configuration software

Use our
MultiOne software
to configure the devices
to your customers needs.
**Free download via
philips.com/multione**

Customize
your devices,
simple and fast.

With MultiOne configuration software, our intuitive tool, you can meet specific requirements of your customers with a limited portfolio of programmable devices. Depending on the type of device, driver or sensor, a combination of features can be configured to create diversity, extra security and costdown improvements.

Main benefits

✓ One multi-functional tool

You can program a luminaire, test it, configure it automatically in production, read out its status and do a complete quality analysis if there are returns from the field. All with one intuitive tool compatible with all Philips configurable drivers.

✓ Ultimate flexibility

Access to the features built into the device (driver or sensor) offers you the flexibility to configure your devices to match specific requirements. It enables optimization of installation, last minute changes, easy diagnostics and maintenance.

✓ Innovative

We bring innovation to your business by allowing you to wirelessly program all Xitanium LED drivers using our MultiOne SimpleSet technology.

Specific features

✓ Functionality

· Adjustable output current
· Adjustable light output
· Adjustable startup time
· End of life indication
