

## Release notes – MultiOne Workflow 3.2

In this release the following items were changed (compared to the previous version):

### Added:

- Support for
  - same devices as MultiOne 3. 2
  - same features as MultiOne 3.2
- Functionality :
  - Data Logging (can be used for reporting)
  - Single shot configuring (one by one)
- Various cosmetic updates

## IMPORTANT NOTICE

1. Before installing, make sure the PC or laptop complies with the minimum system requirements for using MultiOne:

- PC or laptop with Microsoft Windows 7 SP1, 8, 8.1 and 10
  - One or multiple USB 2.0 or 3.0 port(s):
    - o Two free USB ports for use with USB2DALI interface
    - o One free USB port for use with USB2ZigBee interface
    - o One free USB port for use with SimpleSet interface
- Do check if the USB port is strong enough to power the interface*
- At least 45 MB of free disk space

2. Make sure that also the extra conditions are fulfilled:

- The correct Microsoft Windows version,
  - o No Windows XP support
  - o When running the installer on Windows 10, a 'Do not run' button might be shown as the application is not signed. Go to 'more info' to force installation.

- **Microsoft .NET Framework needs to be increased to 4.6.1 (if previous version is still available)**

This is a Microsoft Windows package that MultiOne need for specific functions.

We are not able to include this in our software due to dependence of Windows version.

- o If PC is linked to the internet, and previous version of .NET Framework is available on you system, Microsoft .NET Framework 4.6.1 will be installed (installation takes some extra time)
  - o If PC is not linked to the internet, you need to install manually this version on your PC
- More info and package available on this link
