 - NTC on LedSet
 - OEM Traceability
 - DALI 102 variables
- Functionality :
 - DALI Sniffer
 - Combined Occupancy Sensing / Daylight Harvesting with Field Task Tuning

Various cosmetic updates

IMPORTANT NOTICE

1. Before installing, make sure the PC or laptop complies with the minimum system requirements for using MultiOne:

- PC or laptop with Microsoft Windows 7 SP1, 8, 8.1 and 10
- One or multiple USB 2.0 or 3.0 port(s):
 - o Two free USB ports for use with USB2DALI interface
 - o One free USB port for use with USB2ZigBee interface
 - o One free USB port for use with SimpleSet interface*Do check if the USB port is strong enough to power the interface*
- At least 45 MB of free disk space

2. Make sure that also the extra conditions are fulfilled:

- User Software Key on line or off line installed (no action needed if PC already has a key)
- The correct Microsoft Windows version,
 - o No Windows XP support
 - o When running the installer on Windows 10, a 'Do not run' button might be shown as the application is not signed. Go to 'more info' to force installation.

- **Microsoft .NET Framework needs to be increased to 4.6.1 (if previous version is still available)** This is a Microsoft Windows package that MultiOne need for specific functions.

We are not able to include this in our software due to dependence of Windows version.

- o If PC is linked to the internet, and previous version of .NET Framework is available on you system, Microsoft .NET Framework 4.6.1 will be installed (installation takes some extra time)
- o If PC is not linked to the internet, you need to install manually this version on your PC
More info and package available on this link
