supports your
success

Philips Day-Brite / Philips CFI FluxStream strip,
industrial, and wraparound luminaires

It all adds up

Now, more than ever, working efficiently is a critical component in the success of your projects, especially when it comes to lighting.

From planning and design, through installation, integration, and beyond – even small time-consuming tasks can add up to big project delays that prevent you from moving on to the next job.

At the same time, customer satisfaction is equally important, so you need robust solutions that look, perform and withstand equal to or beyond your customer's expectations.

This is why we expanded the rugged and reliable Philips Day-Brite / Philips CFI FluxStream luminaire family to include strip, industrial and wraparound luminaires.

Before, during, and after installation, you can trust the FluxStream luminaire family to help you quickly complete projects without hassles or troubleshooting, while delivering consistent comfort and long-term energy savings throughout the space.

Convenience

Add convenience before

The FluxStream linear strip family you already depend upon is now expanded to include industrials and wraparounds. The consistent, coordinated family selection provides you with mix & match flexibility while maintaining a similar aesthetic style and light output throughout the space.

FluxStream Wraparound

FluxStream linear strip

- Efficacy: 114-133 lm/W
- Lengths: 2, 3, 4, 8 feet
- Lumen outputs: 2000lm-14000lm
- Color temperatures: 3000K, 3500K, 4000K, 5000K

FluxStream linear industrial

- Efficacy: 126-134 lm/W
- Lengths: 4, 8 feet
- Lumen outputs: 4000lm-14000lm
- Color temperatures: 3000K, 3500K, 4000K, 5000K

FluxStream linear wraparound

- Efficacy: 104-122 lm/W
- Lengths: 2, 4, 8 feet
- Lumen outputs: 2000lm-14000lm
- Color temperatures: 3000K, 3500K, 4000K, 5000K

Add convenience during

FluxStream linear strip, industrial and wraparound luminaires have a consistent ordering nomenclature to save time when specifying and ordering, and offer quick, familiar and hassle-free installation. All versions are dimmable using a variety of drivers, including 0-10V, Mark X, DALI and can be integrated with control systems for advanced functionality along with enhanced energy savings. Additionally, the luminaires accept an integrated emergency (EMLED) battery to provide standby light in the event of an unexpected power loss.

“EZ” models are available with FluxStream linear strip and wraparound luminaires to satisfy budget-conscious projects. See specifications for additional detail.

Add convenience after

With a consistent look and consistent light output throughout any space, the broad FluxStream luminaire family creates comfortable spaces so that your customers are satisfied. Over time, FluxStream luminaires provide reliable, long-lasting performance with low maintenance, so you don't have to return to troubleshoot, and your customers will enjoy reduced maintenance costs.

FluxStream Wraparound

FluxStream strip

FluxStream industrial

FluxStream wraparound

Integrated sensor

Reduce operating costs

In addition to convenience and consistency from FluxStream luminaires, your customers will enjoy the obvious benefits of LED technology – reduced lighting-related energy expenses and reduced operating expenses over the long lifetime of the luminaires.

For additional energy saving or code compliance, a Philips EasySense sensor is available integral to the luminaire that provides occupancy sensing, daylight harvesting, and task tuning.

*Integrated sensor option not available in FluxStream EZ models.
