RightFit

Evolution

Flexible
software maintenance

Count on us as your patients count on you

Philips RightFit Evolution provides software maintenance for your Philips IntelliVue solution. RightFit Evolution protects your investment and helps your organization evolve, clinically and technically, so that your team can focus on providing optimal patient care.

Continually advancing service

RightFit Evolution gives you access to new IntelliVue software versions as they become available, allowing you to take advantage of the latest functionality.

The service agreement helps you get the most from your Philips monitoring solution, continuously opening up new opportunities for improved patient care and a simplified workflow, helping you maintain your competitive edge. With RightFit Evolution, you can preserve the value of your clinical investment, with increased flexibility, maintaining compatibility and interoperability

throughout your institution, on a pre-planned budget, with limited clinician and infrastructure disruption.

Customizable portfolio

RightFit Evolution is part of the Philips RightFit service agreements portfolio which offers a comprehensive range of modular service options. Your coverage can be flexible for your specific vision and needs, enhancing the value of your Philips monitoring solution and providing a solid basis for system-wide security.

What is included within the RightFit Evolution service agreement?

- Maintenance of your IntelliVue software
- Proactive communication on released software upgrades value
- Consulting on new software revisions, content, impact and requirements
- Software upgrade licenses throughout the contract duration
- Project management and implementation labor
- Clinical go-live support and user training on new software revisions
- Hardware required to implement agreed-upon software maintenance (optional)
- Financed by your ongoing operation budget
- Costs locked in for the duration of the contract

Note: Services as well as availability per product is dependent on market

Detailed definitions*

Co-owned implementation: biomedical staff co-owns the delivery of on-site IntelliVue patient monitor upgrade services with Philips. Requires IntelliVue Support Tool license key for all biomedical engineers identified to co-own implementation.

Software maintenance: provision and installation of licenses to use major new releases if and when available

Compatibility Review: assessment of installed hardware, software and network components in order to determine compatibility

Go-life support: End-user training on the new release level in a train-the-trainer format

Notification of new software releases: proactive notification as soon as a new software revision is available.

Hardware required to implement software maintenance: provision of PIC iX PC or server hardware as required to evolve the software to chosen revision

* All services subject to Philips RightFit Service Agreements
