

It's as easy as 1, 2, 3...

1. Fill

Simply lift the green lid and pour in the medication. Close the lid and make sure your child is sitting up straight, ready for therapy.

2. Treat

Press the on button and encourage your child to breathe in and out through the mouthpiece.** InnoSpire Go will indicate therapy completion with audible and visible signals - before turning itself off.

3. Clean

After each treatment remove the mouthpiece and rinse it in warm water. At the end of each day wash it in warm soapy water and once a week disinfect it in boiling water.

PHILIPS

InnoSpire Go

Portable
mesh nebulizer

More time for life

More time for the yummy things in life

Fast, effective and easy to use, the InnoSpire Go nebulizer is specifically designed to shorten asthma treatment time so your child can get back to doing something fun.

Reduces treatment time by 25%*

Treatment in 4 minutes**

An efficient asthma therapy device that indicates therapy completion using audible and visible signals - before automatically turning off.

Virtually silent

A small, portable and discreet nebulizer that can be used anywhere.

Built-in long life battery

The rechargeable battery provides up to 30 treatments between each charge.

Simple - only two parts

The easily detachable mouthpiece makes the InnoSpire Go simple to use, clean and maintain.***
