Asset management

# Multi-year strategic plan

A customized, multi-year asset replacement program aimed at modernizing and standardizing equipment to reduce uncertainty, and make the process easy, transparent and financially feasible.

# **Philips collaboration**

## What are your goals?

- $\cdot$  Replace aging equipment
- $\cdot$  Looking to standardize
- $\cdot$  Improve workflow efficiencies
- Reduce risk

- Improve outcomes
- Respond to changes
- in reimbursement
- Predicable cost models
- Update financial solutions

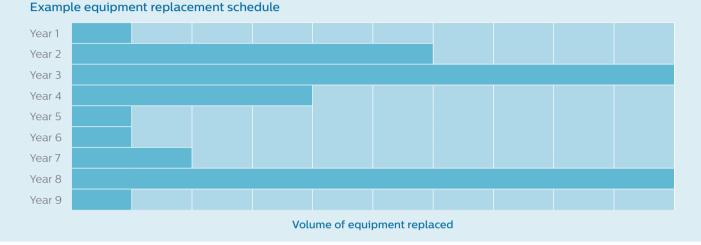

PHILIC

### How it works

The Multi-Year Strategic Plan is designed to help healthcare providers standardize and modernize their equipment. This program provides access to the Philips product portfolio, efficiency and productivity optimization tools, a streamlined upgrade process, and value-add services. Backed by the Philips promise of service quality and customer experience, our partners

benefit from standardization across their network, optimization of asset replacement, and customization of the replacement schedule. These benefits enable customers to maximize the useful life of their systems, and stay current with their technology, enabling their staff to provide quality patient care.

#### In summary

An in-depth and data-driven assessment of the health system's needs, objectives, processes, clinical programs, market, and technology is critical to making certain the resulting partnership is set up for success. Philips has the tools and resources needed to conduct the initial evaluation and draw from it the actionable information

needed to structure the program for the health system. Our goal is to create a meaningful partnership that drives continuous clinical, operational, and quality improvement through our dedication to innovation, clinical science, and an improved patient experience.
