

Installation Guide

FM40/50 Wall Mount Cabinet

The purpose of this guide is to describe installation of the cabinet.

Parts Reference

The following parts and hardware are included with this installation kit (hardware not shown):

Item #	Description	Qty
1	Cabinet Mount with Locking Drawer	1
2	Key, Drawer Locking	1
3	Adjustable Stop	1
4	1/8" Hex Wrench	1

Tools Required: 1/8" hex wrench (provided).

Mounting the Cabinet

3. Using the 1/8" hex wrench provided, tighten two (2) set screws at bottom of slide.

4. Ensure Philips-supplied camlock feet/locking lever (not provided in this kit) are installed on bottom of monitor.

5. Install monitor in camlock rails.

6. Engage locking lever.

Routine Maintenance

Periodically inspect all hardware associated with the mounting system. Tighten or adjust as necessary for optimal operation and safety.

Cleaning the Mounting Assembly

CAUTION: GCX makes no claims regarding the efficacy of the listed chemicals or processes as a means for controlling infection. Consult your hospital's infection control officer or epidemiologist. To clean or sterilize mounted instruments or accessory equipment, refer to the specific instructions delivered with those products.

1. The mounting assembly may be cleaned with most mild, non-abrasive solutions commonly used in the hospital environment (e.g. diluted bleach, ammonia, or alcohol solutions).
2. The surface finish will be permanently damaged by strong chemicals and solvents such as acetone and trichloroethylene.
3. Do not use steel wool or other abrasive material to clean the mounting assembly.
4. Damage caused by the use of unapproved substances or processes will not be covered by warranty. We recommend testing of any cleaning solution on a small area of the mounting assembly that is not visible to verify compatibility.
5. Never submerge or allow liquids to enter the mounting assembly. Wipe any cleaning agents off the mounting assembly immediately using a water-dampened cloth. Dry all mounting assemblies thoroughly after cleaning.
