

Reducing infection across the continuum of care

Philips Disposable Lead Sets for Single Patient Use for adults and pediatrics work with your existing Philips monitoring trunk cables and remain with the patient throughout the entire hospital stay, ensuring both extra protection from HAIs and seamless clinical workflow. They take away the need to disinfect your lead set by

eliminating the risk of cross contamination between patients. With Philips interchangeable disposable and reusable leads, healthcare professionals can choose when to apply extra HAI protection based on each patient situation.

New lightweight, PVC free, peelable ribbon-style cable allows customized fit for every patient, eliminating "spaghetti syndrome."

Leads last up to 25 connection cycles.

Compatibility with Philips trunk cables allows interchangeable use of disposable or reusable leads, simplifying clinical work flow.

PHILIPS
sense and simplicity

Disposable ECG Leads highlights

Feature		Benefit
Single patient use		Seamless patient flow between departments; no need to disinfect; quality assurance; reduces risk of HAI.
Compatible with Philips trunk cables		Ability to switch between disposable and reusable leads with no additional investment required. This allows practitioners to tailor disposable usage to your HAI high-risk patients (i.e. patients with IV lines; known infections). Leads are validated for all settings, including defibrillation and telemetry.
Protective cap		Protects telemetry patient-worn device from water and debris ingress; patient can shower.
No adapters with Philips equipment; PVC and DHEP free; lead length optimized		No accidental discard; reduces troubleshooting and loss. Eliminates patients exposure to potential harmful vapors, and hazardous pollutants when disposed. Disposable portion of product solution has been designed to minimize waste.
Standardization: Monitoring: Telemetry		No need to disconnect/reconnect leads when patient moves between departments; quick set-up; no training required.
Flat, shielded, ribbon-style lead set		Disposable leads are easy to differentiate from your reusables, and offer excellent quality. Each lead length can be customized to fit the individual patient, which reduces tangling and improves patient comfort.

Ordering information

Set	Product number	Description	Protective cap	Qty
3-lead set	989803173121	Bedside AAMI; 3.3 ft (1 m)	No	20
	989803173141	IntelliVue Telemetry AAMI; 2.8 ft (85 cm)	Yes	20
	989803174201	Bedside IEC; 3.3ft (1 m)	No	20
5-lead set	989803173131	Bedside AAMI 3.3 ft (1 m)	No	20
	989803173151	IntelliVue Telemetry, AAMI 2.8 ft (85 cm)	Yes	20
	989803174211	Bedside IEC; 3.3ft (1 m)	No	20
