Interventional applications platform

IntraSight interventional applications platform

Smart. Simple. Seamless.

As the number of coronary and peripheral vascular procedures grows, so does the need to work smarter and faster.

Philips IntraSight offers you a comprehensive suite of clinically proven¹⁻⁵ imaging, physiology and co-registration⁶ tools on a modern, secure platform that will help you simplify complex interventions, speed routine procedures and improve lab efficiencies.

These best-in-class interventional tools ultimately allow you to go beyond the angiogram and complete your view of the target vessel so you can make fast, informed clinical decisions.

IntraSight is built on a modern, scalable platform that will be ready to provide you with new innovations and tools as they become available in the future.

Smart

Uniting today's best-in-class imaging, physiology and co-registration tools on a secure applications based platform.

* Only available on IntraSight 7

Built for today's lab and ready for tomorrow's, IntraSight is a scalable platform designed to meet the evolving needs of your lab.

Much like today's smartphones, the applications-based platform will allow you to more quickly update your system as new innovations are released, all without expensive hardware upgrades. Built using a common Philips architecture, IntraSight is also prepared to accommodate future cross-modality opportunities within the Philips lab.

Simple

Delivering an outstanding user experience with a modern, intuitive interface that minimizes learning curves and increases workflow confidence.

Fast to learn and easy to use, so you can focus on what matters most, your patients.

Demonstration mode enables you to speed training, increase workflow confidence and maintain staff proficiency.

Seamless

Optimizing lab performance with tableside control, efficient patient data management and proactive remote service diagnostics.

Philips allows you to run an entire case without breaking scrub.

The new touchscreen module (TSM) offers total control within the sterile field. Run an entire case tableside as you quickly navigate, annotate and measure to your exacting specifications, all with the ease and responsiveness of using a tablet, even when wearing gloves and under a sterile drape.

“IntraSight has made an immediate impact in our lab. It’s so simple and intuitive to use that it took us no time at all to get used to it. It has made using physiology and imaging even quicker and easier which is a great advance for us and for our patients.”

- Dr. Rasha Al-Lamee
Imperial College London, Hammersmith Hospital

Unrivaled security

IntraSight is protected by the advanced data encryption technology of Windows 10, your best defense against cybersecurity threats.

Customizable access and data management settings and policies are available to fit your organization’s individual security needs.

Tools that see beyond the angiogram.

Physiology

Choice of evidence-based iFR and FFR modalities enable you to quickly assess ischemia. iFR pullback technology allows for physiologic guidance.

Imaging

Broad portfolio of coronary and peripheral applications, including high-resolution rotational IVUS and Philips’ exclusive plug-and-play digital IVUS.

Co-registration

Combine iFR and IVUS data with the angiogram using Philips’ exclusive iFR and IVUS Co-registration⁶ technology.

Reduce procedure time and chance for errors with efficient patient data management.

Easily integrates into any cath lab. Quickly access and manage case data across modalities within a single case menu.

Get your procedures off to an even faster start when integrated with a Philips X-ray system as you import patient information at the touch of a button.

Keep your systems running smoothly with Philips Remote Service (PRS).

PRS provides continuous monitoring and anomaly detection, resulting in faster service response and action planning, along with improved uptime.

The 24/7 monitoring service is delivered securely through a VPN or SSL from the Philips Remote Service Data Center.

IntraSight on a mobile platform

Providing versatility, IntraSight can now be experienced on an easy to maneuver mobile cart.

Designed for all environments

The Philips IntraSight on mobile is ideally suited for acute and non-acute settings. Customize your platform, select the best-in-class imaging and physiology tools that are right for your coronary or peripheral vascular patients.

Seamless mobile integration with any interventional suite enabling the use of Philips interventional precision tools.

Mobile 5 Series

IntraSight Mobile

Series 3

Series 5

Configurations/Features

	Series 3	Series 5
IntraSight Mobile - Interventional application platform (Includes IntraSight Panel PC with 19" touch screen monitor, mobile cart base with storage bin, DICOM Network Connection and Windows 10 OS)	●	●
Imaging (IVUS) license (includes digital, rotational and ChromaFlo IVUS)	●	●
Physiology license (includes iFR Spot/Pullback - Hyperemia free lesion assessment modalities and FFR modality)		●
Touch Screen Module (TSM)	Optional	●
Philips Remote Services	●	●

Note: SpinVision and printer are optional extra parts
