

# PHILIPS

IntelliSpace Cardiovascular

## Enhance your Cardiovascular IT solution by upgrading to the latest IntelliSpace Cardiovascular\* version

### IntelliSpace Cardiovascular 6.0

#### What's new?

- Support of Imaging Object Change Management (IOCM) for enhanced Vendor Neutral Archive (VNA) integration<sup>(1)</sup>
- Extended infrastructure support with Windows Server 2019 and SQL Server 2019
- Measurement group configuration tool, incl. the ability to create and manage your own customizable measurement groups
- Web-based Pacing-ICD Check Module<sup>(2)</sup> enhancements, incl. the ability to amend a finalized report and device search tool improvements
- Web-based Echo Module enhancements, incl. the ability to carry-over patient information from prior, finalized studies to the current study, view unmapped measurements and move a study to a different patient folder
- Report Template Editor enhancements, incl. the ability to copy and paste tables and sections, undo and redo actions and display the header and footer in each page of the report

#### Clinical benefits

Provides a single point of access to images and information anytime and virtually anywhere<sup>(3)</sup>. Perform comprehensive analysis, quantification and reporting for fast, informed clinical decision making.

#### Operational benefits

Provides interoperable access to a variety of systems and applications from a single location, allowing you to analyze data to streamline efficiency.

#### Financial benefits

Decreases deployment costs and time while interfacing to existing systems through zero-footprint technology.

#### Augmented security

Best-practice industry standards to combat the evolving cyber security threats in Healthcare. Enhanced security and Enterprise protocols. Operating System required: Windows 10 and higher.

\* Note that availability of IntelliSpace Cardiovascular varies per market, please contact your Philips representative for more information.

<sup>(1)</sup> Requires that the Central Archiving System/DICOM Archive supports the Image Manager/Archive Actor transactions of the Imaging Object Change Management profile.

<sup>(2)</sup> Optional purchasable licenses.

<sup>(3)</sup> It is the user's responsibility to ensure that Philips network performance requirements (such as performance, VPN) for IntelliSpace Cardiovascular are met.
