Flexible office lighting

Philips Lighting Services for SpaceWise

Make the most of **your office lighting**

High-quality, energy-efficient lighting will not only save you money, it also helps to create an environment in which both people and ideas will flourish.

By partnering with Philips Lighting, you can keep your office lighting in perfect working condition, every single day. At Philips, we understand that your office lighting equipment is a business-critical investment you'll want to protect. With our Lifecycle Services, we can help you extend the products' lifetime and optimize their performance, with fewer interruptions and unexpected costs.

With SpaceWise you are in control!

SpaceWise is an innovative LED lighting system with embedded wireless controls, which allow you to create and configure lighting zones to suit your space and layout. The system allows lighting to be delivered to 'zones', only where and when required, whilst other non-occupied zones remain at a background lighting level – saving energy, but not at the expense of visual comfort.

Take your office lighting to the next level with Philips Lighting Services for SpaceWise:

Save on energy & cut the costs

Automatic dimming ensures you only pay for lighting when and where it is needed.

Easy to install and flexible

Installation is easy and wireless controls ensure the system can be easily reconfigured to support any office layout changes.

Visual comfort for employees

Light levels can be adjusted to suit personal preferences for comfort and productivity.

Protect the planet

Sustainable LED technology doesn't just help the environment – it helps keep you compliant and you may qualify for Green Building Certification credits.

“

The new control system provides us with more precise zoning so that only occupied areas are fully lit while other luminaires in the network stay at background level. The dimming functionality also enables us to adjust lighting levels within the zones to suit **the preferences of the people working in those spaces.**”

– **Les Smith**, EMEA Critical Facilities Engineering
Manager Citi, Canary Wharf, London

Lifecycle Services

Extend the life of your lighting installation

With a tailor-made maintenance plan and remote assistance from our lighting experts, you'll be sure that your office lighting is always in perfect working order. Created especially for the SpaceWise system, we have developed two services packages that give you the peace of mind of knowing that your lighting is in good hands. Let us take care of the lighting, so you can focus on your business.

Philips office lighting services for SpaceWise

Essential Package

Protect your investment

With the Essential package, we support your facility manager with the right preventive maintenance and remote support via our experts:

- **Preventive annual health checks** keep your SpaceWise system working perfectly, with proposed corrective actions to prevent issues.
- **Zoning and system settings** are annually verified and updated during health checks.
- **Ask any question** about your SpaceWise system: we will provide you with direct contact information so you can consult our experts for remote support.

Premium Package

Hassle-free operation

With the Premium package, we ensure that you'll have a hassle-free experience at a fixed cost, by enriching the Essential package with:

- **Corrective maintenance** for all failures to maximize the availability of your SpaceWise system, including spare parts and installation during scheduled maintenance visits by our technical experts.
- **System reconfiguration** so you'll always have the right settings and maintain lighting comfort for your employees, in line with changing needs in your flexible office space.
- **Electronic documentation** for your entire lighting installation lets you go paperless and makes sure you will always have fully up-to-date information for all maintenance activities.
