

# Compatibility and lower total cost of ownership

The new Philips InstantFit LED T5 lamps have hassle free installation with a simple lamp-for-lamp replacement. They fit straight into existing T5 luminaires and our 50,000 hour¹ guaranteed lifetime is 43% longer lasting compared to fluorescent with up to 35,000 hours³ to help cut maintenance costs in half. Longer life combined with bare lamp wattage reduction of over 50% when compared to a 54W T5HO lamp leads to a much lower total cost of ownership.

Our InstantFit T5 LED lamps won't flicker or cause glare. They switch on instantly with excellent color consistency and uniform visual appearance. All in all, an attractive energy saving and mercury-free alternative to fluorescent tubes.

### **Benefits**

- Instant light
- Polycarbonate tubes provide excellent heat management
- UL Listed

#### **Features**

- · Excellent light quality
- Plug and play installation with Philips InstantFit technology.
- · Wide ballast compatibility
- · DLC listed

- 1. LED lifetime means the length of time (in hours) until half of the LED light sources maintain at least 70% of their initial lumen output (B50, L70). Testing with a ballast whose ballast factor is ≤ 0.88
- Photometric testing consistent with IES LM-79.
- 3. Average life under engineering data with lamps turned off and restarted every 12 operating hours. Raged Average Life is the length of operation (in hours) at which point 50% of a large sample of lamps will still be operational and 50% will not.
- This lamp is DLC 4.0 qualified.

## Energy saving solution

Estimated Lighting Costs Using a standard 54W High Output (HO) lamp (on an ICN-2S54-N ballast)

tamp (on an icit 2004 it bat	····		
Present Wattage		62	W
× Annual operating hours		4,000	hrs
	=	248,000	Watt-Hours
÷ 1,000	=	248	kWh per year
× kWh rate of \$0.11 <sup>†</sup>	=	\$27.28	per year
× 100 lamps		\$2,728.00	annual energy cost

#### Estimated Lighting Costs Using a Philips 24W InstantFit LED T5 High Output (HO) (on an ICN-2S54-N ballast)

Present Wattage		28	W
× Annual operating hours		4,000	hrs
	=	112,000	Watt-Hours
÷ 1,000	=	112	kWh per year
× kWh rate of \$0.11 <sup>†</sup>	=	\$1232.00	per year
× 100 lamps			annual energy cost
^ 100 tallips			per space

Total estimated annual savings \$1,562.00

 $\Diamond$  Based on 100 lamps per space operating at 4,000 hours per year.

<sup>†</sup> This example shows energy savings based on \$0.11per kWh, your energy savings may vary depending on energy costs in your geographic location.
