Real Insights in Real Estate Management

A new data driven approach for a **changing world**

Every day, the world presents new challenges in corporate property portfolio management. Cost control, increasing labor productivity, and green sustainability objectives can suddenly clash with the changing state of economic or corporate affairs.

At Philips Lighting, we understand these challenges. Complexity of searching for better ways to improve operational and financial performance needs to be balanced with employee comfort and productivity.

Meet InterAct Office

It is a smart and scalable wireless system that upgrades your lighting using existing infrastructure hassle free. Instant energy savings and data driven insights with a tracking dashboard enable green business decisions. It requires no upfront investment. Just a monthly subscription with configurable contract length.

Benefits Include:

Reduce	Gain
CapEx	Cost efficient lighting
OpEx	Actionable data analytics
Distractions from core business matters	Reliable data accessible from anywhere
Business disruptions	Fast paybacks
CO ₂ emissions	Green sustainability
Hassles	Scalable solutions

Save.

Save immediately

Benefit from up to **70% savings** on your current lighting operational costs that immediately reduce your environmental impact.

See.

Seeing is believing

It collects and delivers accurate and granular data, supports business decisions across your portfolio and is accessible from anywhere, at anytime.

Scale.

Scale as you grow

It's a flexible, future-ready, cloud-based lighting system that grows with your organization.

With InterAct Office you and your organization can achieve an innovative workspace dedicated to cost-savings, productivity and well-being – across your entire global portfolio.

Creating smarter workspaces

When evaluating options to make your buildings more efficient and smart, you have many choices. Whichever option you consider, it needs to be implemented quickly, deliver results instantly, be scalable across your ever changing portfolio and deliver cost efficiencies as well as employee comfort and satisfaction.

Accessible

Leverage your existing infrastructure.

Affordable

No upfront investment or CAPEX required.

Scalable

Grows with your business needs and portfolio globally.

Sustainable

LED lighting is energy efficient and reduces environmental impact.

Cost effective

Instant OPEX savings, enabled by up to **70% savings** in energy costs.

Insightful

Delivers granular data insights on energy consumption and moving forward on occupancy and more from one dashboard.

Hassle free

We take care of the installation, optimization and management of the system.

Future-ready

An infrastructure that allows for expansion, and enables automatic system upgrades.

Every office building has existing lighting. Why not optimize it and make it smart?

The cloud-based software is easily accessible from anywhere, at anytime and keeps you up to speed on operations and performance.

Benefits include:

1. Easy monitoring of retrofit deployment
2. Intuitive map navigation with key building metrics shown in pop-up tag
3. View and compare performance across different buildings and locations

InterAct Office combines energy efficient LED lamps and luminaires that easily retrofit into your existing 2x2/2x4 fixtures equipped with lighting sensors. Take the next step towards the future of corporate real estate management. Contact us today to see how InterAct Office can serve your needs.
